

# Course Assessment Report - 4 Column

## Great Basin College

### Courses (SCI) - Biology

Course Outcomes 1 and ctu.unitid = 659	Means of Assessment & Criteria / Tasks	Results	Action & Follow-Up
BIOL 224 - Anatomy & Physiology II - Anatomical features - Identify listed anatomical features of the endocrine, circulatory, lymphatic, immune, respiratory, urinary, digestive, and reproductive systems <b>Next Assessment:</b> 2020-2021  <b>Course Outcome Status:</b> Active	<b>Assessment Measure:</b> Practical anatomical exams for each system <b>Assessment Measure Category:</b> Exam <b>Criterion:</b> 80% average	11/12/2015 - Practical Exam average 93.3% <b>Criterion Met:</b> Yes <b>Reporting Period:</b> 2014-2015	
BIOL 224 - Anatomy & Physiology II - Comprehension of the physiology - Demonstrate comprehension of the physiology of the endocrine, circulatory, lymphatic, immune, respiratory, urinary, digestive, and reproductive systems  <b>Start Date:</b> 11/11/2015 <b>Course Outcome Status:</b> Active	<b>Assessment Measure:</b> Objective exams for each system <b>Assessment Measure Category:</b> Exam <b>Criterion:</b> 80%	11/12/2015 - Physiology Exam average 65.0% <b>Criterion Met:</b> No <b>Reporting Period:</b> 2014-2015	11/12/2015 - 65% is well below the stated criterion. When averaged with the 93.1% anatomical average the overall is 79.1%. Close to the 80% overall target. I feel that the difference is largely due to the ease with which desired outcomes with respect to anatomy can be identified. I will strive to better identify desired physiological outcomes.
