TRANSFERRING CREDITS FROM GBC

Transferring Credits from GBC

Many GBC students plan to transfer to another college or university to complete a bachelor's degree. If you intend to transfer, work closely with your academic advisor and the transfer institution to develop an educational plan that meets your academic goals.

Before registering for classes, review the catalog and degree requirements of your intended transfer institution to determine how GBC courses will apply toward your chosen program. Planning ahead can help ensure that the courses you take satisfy both GBC degree requirements and the requirements of your future institution.

Although many GBC courses transfer successfully to colleges and universities throughout the United States, each institution determines how transfer credits apply toward its own degree requirements. Students are encouraged to consult with advisors at both GBC and the receiving institution to confirm transferability and degree applicability.
