ASSOCIATE OF APPLIED SCIENCE & CERTIFICATE OF ACHIEVEMENT PARAMEDIC PROGRAM

STUDENT HANDBOOK
2022-2023

Approved by the Nevada Division of Public and Behavioral Health-EMS Program
4150 Technology Way, Suite 101
Carson City, NV 89706
775-687-7590
“Welcome to Great Basin College’s Associate Degree Paramedic Program. Paramedicine is a dynamic profession that offers almost unlimited opportunities and challenges. They play a key role in the delivery of health care. The roles for paramedics continually diversify and the need for more paramedics will be greater than ever in the coming decade. You will be joining and increasing number of GBC graduates who are making a difference in the health of their patients and in the dramatic changes taking place within the health care system!

The paramedic faculty support the Mission of Great Basin College to enrich lives through student-centered educational programs. We are committed to enriching your life and those you care for in the future by preparing you to provide high quality paramedic care and to engage in life-long learning.”

Amber Donnelli, PhD, RN
Dean, Health Science and Human Services

Purpose of the Student Handbook

The purpose of this handbook is to assist you in understanding more fully the policies, practices, and procedures of the Associate Degree Paramedic Program and the Certificate of Achievement Paramedic of Great Basin College. This handbook serves as the source of information about the policies and procedures in the paramedic program. You are required to sign a statement indicating you understand and agree to abide by these policies and guidelines each year that you are in the paramedic program. Because policies and procedures are continuously subject to change by external and internal sources, the paramedic faculty reviews and modifies these policies and practices as necessary. Students will be notified in writing of any changes made during the academic year.

This handbook is not all-inclusive, nor does it replace the Great Basin College General Catalog 2022-2023 or the Nevada System of Higher Education (NSHE) Board of Regents Code Title 2, Chapter 6, which addresses misconduct. The provisions of this document are not to be regarded as an irrevocable contract between the student and the GBC paramedic program.

IMPORTANT NOTE: In most cases where a conflict may exist between the guidance in this handbook and the GBC Catalog, the GBC Catalog shall take precedence. However, some unique aspects of paramedic education require policies different from those for other GBC students, for example, student health requirements.

Nondiscrimination for Disability

Great Basin College is committed to providing equal educational opportunities to qualified students with disabilities in accordance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973. A qualified student must furnish current verification of disability. The Students with Disabilities Office, located in Berg Hall, will assist qualified students with disabilities in securing the appropriate and reasonable accommodations, auxiliary aids, and services. For more information or further assistance, please call 775.753.2271.
I have read, understand and agree to abide by the policies and guidelines stated in the Great Basin College Associate of Applied Science Degree Paramedic Program 2022-2023 Student Handbook.

I understand that as a condition of enrollment in Great Basin College’s Associate of Applied Science Degree Paramedic Program, I agree that a clinical /agency may, at any time, require a “for cause” drug and/or alcohol screen. I agree to execute a consent for release of the results of the drug and/or alcohol screening information to the clinical facility/agency should they request such information.

I understand and acknowledge that once admitted to the Great Basin College’s Associate of Applied Science Degree Paramedic Program, failure to maintain the professional and/or ethical standards of the program may result in dismissal from the program. I also understand that the Health Science and Human Services Department Admission and Progression Committee may at any time request information from the Administrative Officer of Great Basin College to determine whether I have ever violated NSHE (Nevada System of Higher Education) Code.

I understand and acknowledge that no resources or information from any paramedic course can be shared outside the classroom or lab.

My emergency contact person(s) are listed below. I understand that this individual or individuals are responsible for ensuring that I am transported home in the event one of my faculty or the Associate of Applied Science Degree Paramedic Dean determines that I am not able to continue being present in the classroom, lab, or clinical setting.

Witness: (Faculty/ Dean)          Date

Keep this copy in this handbook for future reference. The Student Agreement at the back of this handbook must be signed and returned to the GBC Health Science and Human Services Department.
During my enrollment in the Associate of Applied Science Degree or Certificate of Achievement in Paramedic Program and under the direct supervision of a paramedic faculty member, I agree to allow a paramedic student classmate to perform the following procedures on my person:

1. Subcutaneous injection
2. Intradermal injection
3. Intramuscular injection
4. Intravenous catheterization (peripheral)

I agree to hold harmless and waive the liability of the student and/or students performing the procedure(s), the supervising instructor and Great Basin College for any injuries incurred as a result of my agreeing to have these procedures performed on my person.

Keep this copy in this handbook for future reference. The Agreement at the back of this handbook should be signed and returned to the GBC Health Science and Human Services Department.
During your participation at the Great Basin College Practice Lab, you will be an active participant and observer of the performance of other individuals in the management of acute medical, surgical, and other health care events in simulated experiences.

The objective of the simulation experience program is to educate pre-licensed and licensed health care practitioners to better assess and improve their performance in evolving health care situations. Simulations are designed to challenge a healthcare professional’s response and judgment in stress environments.

Due to the unique aspects of this form of training, you are required to maintain and hold confidential all information regarding the performance of specific individuals and the details of the scenarios.

There is continuous audiovisual digital recording during all simulations which will be used for educational purposes. This video recording is considered a QUALITY ASSURANCE TOOL and is protected by Federal Law.

By signing this agreement, you agree to maintain strict confidentiality regarding both your and others' performance, whether seen in real time, on video, or otherwise communicated to you. Failure to maintain confidentiality may result in unwarranted and unfair defamation of character of the participants.

To maintain optimal simulation experiences for other learners who will be following you in the center, you are to maintain strict confidentiality regarding the specifics of the scenarios. A breach of confidentiality may result in loss of privileges in the Practice Lab.

By signing below, you acknowledge you have read and understand this statement and agree to maintain the strictest confidentiality about the performance of individuals and the simulation scenarios you observe.

_______ I agree to maintain strict confidentiality about the details of the scenarios and the performance of other participants during scenarios at Great Basin College Practice Lab.

I authorize the Great Basin College Practice Lab to use the video recording(s) and photographs made in the Practice Lab for the following purposes:

_______ 1) Debriefing scenario participants,
_______ 2) Administrative review,
_______ 3) Educational research,
_______ 4) Commercial purposes, which can include public relations, promotional advertisements, and/or fund-raising activities. I understand that, unless otherwise approved by me, I will not be specifically identified.

Rev. June 2022
Great Basin College Mission Statement
Great Basin College enriches people’s lives by providing student-centered, post-secondary education to rural Nevada. Educational, cultural, and related economic needs of the multicounty service area are met through programs of university transfer, applied science and technology, business and industry partnerships, developmental education, community service, and student support services in conjunction with certificates and associate and select baccalaureate degrees.

Mission of the Associate of Applied Science in Paramedic Program & Certificate of Achievement Paramedic

To provide an accessible, student-centered, post-secondary paramedic education that prepares graduates for paramedic practice and ensures that patients within our communities receive a higher level of EMS care by paramedics trained with the highest standards.

Goal

To prepare competent entry-level Emergency Medical Technician Paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

Philosophical and Conceptual Basis for Achievement of College and AAS Missions

Paramedic faculty endorse the mission, goal, and outcomes of Great Basin College. The paramedic faculty act on the college mission and values through the pursuit of excellence in teaching, promoting student success, and providing service to rural Nevada citizens to enhance their health and quality of life. The philosophy of the paramedic faculty is rooted in the core values of holism, caring, diversity, advocacy, integrity, and excellence. Student learning outcomes of the Associate of Applied Science Degree Paramedic Program and Certificate of Achievement Paramedic curriculum are based on competencies determined by the faculty to be necessary for safe and effective paramedic care.

The faculty designed the associate degree paramedic education program to prepare graduates as providers of paramedic care for individuals and families experiencing common, acute, and chronic health problems, as well as trauma emergencies. As an entry-level paramedic, the AAS and Certificate of Achievement graduate can apply best evidence, available resources, and information technology to assure high quality and safe paramedic care. The AAS and Certificate of achievement graduate can manage direct care for patients and participate as a member of paramedic and interprofessional teams to achieve positive health outcomes for patients. Standards of practice and professional paramedic values are used to guide practice by the AAS and Certificate of Achievement graduate.

The AAS Paramedic and Certificate of Achievement Paramedic program is built on competencies derived from the major concepts the paramedic faculty consider to be central to associate degree and certificate paramedic practice. Those concepts are:

- Patient-centered care
- Professionalism
- Teamwork
- Environment and context
- Evidence-based practice
- Clinical reasoning
- Quality improvement
- Safety

The faculty value paramedic education as a life-long dynamic process in which the learner is an active participant, and in which education is the responsibility of both the learner and the paramedic faculty. The faculty provide a learning environment that is responsive to a range of individual learning styles, needs, rates of learning, and abilities. The curriculum, teaching strategies, and educational experiences are evidence-based and support the development of critical thinking, problem solving, and analytical reasoning. The faculty value open, honest communication with students and strive to provide a culture of learning in which guidance and evaluation promote self-esteem and confidence in the student. The faculty based the curriculum on the guidelines that learning best occurs when
instruction is organized in a manner that leads the learner from simple to complex concepts and skills with experiential opportunities to apply learning throughout the process.

Paramedic faculty have considered professional standards, best practices, guidelines and competencies in developing an evidence-based curriculum to prepare graduates of the Great Basin College AAS and Certificate of Achievement Paramedic program as entry-level Nationally Registered Paramedics. The curriculum is designed and organized using the program student learning outcomes listed below as the basis for all activities related to the teaching/learning process, including delivery of instruction, learning activities, and evaluation of student progress.

**AAS and Certificate of Achievement Paramedic Program Student Learning Outcomes**

Upon completion of the AAS and Certificate of Achievement Paramedic Program, the graduate will have accomplished the following six program student learning outcomes:

1. Demonstrate integration of cognitive knowledge, skills proficiency, and critical thinking skills as an entry level Nationally Registered Paramedic.

2. Apply therapeutic and professional communication skills when working with patients, patients’ significant others, colleagues, other health care providers and members of the community.

3. Incorporate the professional attributes of integrity, empathy, self-motivation, self-confidence, communication, teamwork and diplomacy, respect, patient advocacy and safe delivery of care into practice.

4. Recognize the importance of research and scientific inquiry to promote continuous, quality improvement in prehospital health care delivery.

5. Recognize and acknowledge that the emerging roles and responsibilities of the Paramedic include public education, health promotion, and participation in injury and illness prevention programs.

6. Assume the role of leadership as an advanced life support provider and role model for other EMS providers.

Student achievement of the program learning outcomes is demonstrated through competencies that are comprised of the cognitive, affective, and psychomotor domains of learning. Students must be successful in each domain to complete the course. Competency statements at both the program and course level are used to evaluate students’ achievement of course and program student learning outcomes. Competencies required for each Program Student Learning Outcome are listed below.

**Program Student Learning Outcomes and Competencies**

Curriculum Standards are based directly on the National Highway Traffic Safety Administration in cooperation with the U.S. Department of Health & Human Services Public Health Service, Health Resources & Human Services Administration (HRSA) EMT-Paramedic National Standard Curriculum.

All students graduating from GBC’s EMS - Paramedic program will demonstrate the following competencies as stated in the National Emergency Medical Services Education Standards, December 2021.

1. Demonstrate integration of cognitive knowledge, skills proficiency, and critical thinking skills as an entry level Nationally Registered Paramedic.
   a. Integrate scene and patient assessment findings with knowledge of epidemiology and pathophysiology to form a field impression.
   b. Develops a list of differential diagnoses through clinical reasoning to modify the assessment and formulate a treatment plan.
   c. Deliver care within expected timeframe.
   d. Revise the plan of care based on an ongoing evaluation of patient outcomes including recognition of alterations to previous patient conditions.
   e. Demonstrate safe performance of psychomotor skills for efficient, safe, and compassionate patient care.
f. Accurately document all aspects of patient care.
g. Anticipate risks and predict and manage potential complications.
h. Prioritize patient care.

2. Apply therapeutic and professional communication skills when working with patients, patients’ significant others, colleagues, other health care providers and members of the community.
   a. Provide patient-centered transitions of care and hand-off communications to ensure safe, uninterrupted medical care.
   b. Use patient care technologies, information systems/technologies, and communication devices to support safe paramedic practice.
   c. Apply patient care technologies as appropriate to address the needs of a diverse patient population.
   d. Evaluate inter and interprofessional communication and teamwork for the purpose of delivering safe, evidence-based, patient-centered care.

3. Incorporate the professional attributes of integrity, empathy, self-motivation, self-confidence, communication, teamwork and diplomacy, respect, patient advocacy and safe delivery of care into practice.
   a. Implement conflict resolution principles as needed.
   b. Practice within the legal and ethical frameworks of paramedic practice.
   c. Serve as a patient advocate.

4. Recognize the importance of research and scientific inquiry to promote continuous, quality improvement in prehospital health care delivery.
   a. Monitor patient outcomes to evaluate the effectiveness and impact of paramedic care.
   b. Interpret information about outcomes of care for populations served in a variety of healthcare systems
   c. Provide recommendations to close identified gaps between local and best practice.

5. Recognize and acknowledge that the emerging roles and responsibilities of the Paramedic include public education, health promotion, and participation in injury and illness prevention programs.
   a. Provide patient teaching that reflects patient-centered concepts including developmental stage, age, culture, patient preferences, and health literacy consideration.
   b. Implement paramedic interventions directed at the attainment, intervention, and maintenance of physical and mental health and the prevention of illness across the life span in a variety of clinical settings.

6. Assume the role of leadership as an advanced life support provider and role model for other EMS providers.
   a. Apply management skills and knowledge of the rules and principles of delegation when working with other health care team members.
   b. Apply management and supervisory skills to the care of diverse patients in a variety of healthcare settings
   c. Initiate a plan for ongoing professional development and lifelong learning.
Cell Phones and Pagers
Cell phones and other hand-held devices are not to be used for texting and email functions during class or clinical time. Sound should be turned off on all personal electronic devices carried in classrooms, clinical, or the Practice Lab. Smart phones, IPADS®, Kindles®, Skyscape®, etc. can be used to access relevant resources for selected classroom, clinical, and Practice Lab activities.

E-mail
Students are required to check their e-mail at least two (2) times a week because it is the primary route used for official departmental and course communications. Changes to email addresses must be reported to Admissions and Records immediately.

● Always include a subject line when emailing faculty.
● Remember some comments may be taken the wrong way be specific when creating a message.
● Be respectful to your faculty and fellow students when sending email.

In Course Announcements
Students are required to check course announcements for communications or changes specifically to the course or program.

Classroom Taping
No classroom content of any type may be videotaped, audiotaped, recorded, or transmitted in any manner without the written permission of the instructor and each member of the class. Any content recorded becomes the property of the course instructor. This is for the protection of the confidentiality of patients, students, instructors, and GBC staff. Students in the class will be required to sign a release form to allow recording in the course. Recordings must be destroyed at the end of the semester.

Social Media and Online Communication - Ethics and Legal Liability
The Code of Ethics for Paramedics (Appendix F-2) addresses your responsibility to behave in a manner consistent with professional ethics and values in relation to human dignity and maintaining health care and work environments conducive to health care quality. The paramedic faculty expects students to adhere to that code in all matters related to their classroom and clinical experiences, as well as working relationships, both in person and through social media and online communications.

Students are reminded that they are legally liable for anything they write or present online. Students can be disciplined by GBC for commentary, content, or images that are defamatory, pornographic, proprietary, harassing, libelous, or that can create a hostile work environment. Students can also be sued by GBC employees, clinical agencies, and any individual or company that views their commentary, content, or images as defamatory, pornographic, proprietary, harassing, libelous or creating a hostile work environment.

To avoid negative impacts resulting from unwise or inappropriate use of social media, be aware of the following:

● If you post anything about GBC or the paramedic programs, make it clear that you do not represent the college or paramedic programs, nor their views.
● Be aware not only of the content you post, but of any content that you host (e.g. comments others post on your site). Content you host can have the same effect as content you post.
● Potential employers may use social media to evaluate applicants. Inappropriate content may eliminate job opportunities.
● Once you have posted via social media, it is out of your control. Others may forward it, save it, repost it, etc. It is almost impossible to retract after it is posted.
● If you disclose confidential information about patients, other health care providers, fellow students, or faculty, the college and/or health care facility may take legal action against you. Disclosing patient confidential health information is a violation of HIPAA and can result in severe fines.
The paramedic faculty recognizes that social media sites – Facebook, Twitter and others offer alternative ways to reach and communicate with friends and other students. The responsible use of social media strengthens our paramedic programs’ reputation within the community and expands public awareness of our varied educational options.

The following policies and procedures must be adhered to in all use of social media that in anyway relates to or mentions GBC and/or the paramedic programs:

1. The social media site content must not replicate information that is available on the college web page.
2. Material and content from classes may not be copied and placed on social media sites, including personal information regarding patients, students, instructors, or other GBC staff.
3. Personal blogs should have a clear disclaimer that the views expressed by the author in the blog is the author’s alone and do not represent the views of GBC paramedic programs or the Health Science and Human Services Department.
4. Information with GBC affiliation should only be information that could be contained in a resume.
5. Information published on a blog should comply with HIPPA, FERPA, and GBC confidentiality policies.
6. Students must be respectful of all persons and their right to privacy.
7. Do not reference GBC faculty, staff, or students without their written consent. Do not use their images or likeness without consent.
8. Respect copyright laws and site sources appropriately. Plagiarism still applies to online content. GBC logos may not be used without written consent from Department Chair.
9. Any press or media contacts should be referred to John Rice at 753-2260.
10. All requests for social media development should include its purpose and objectives, name of the social media site, and the name of the moderator, with request forwarded to the Dean of the Health Science and Human Services Department at 753-2135.
11. Student must not be friends with faculty on Facebook until such time as the student has graduated or left the college.

Address, Name, and Phone Changes
Students must notify the Paramedic Administrative Assistant when any changes are made in name, address, email address, or phone numbers so that contact information is updated, and emergency messages can be delivered. Students are to update their contact information into My GBC themselves.

Inclement Weather
If classes are canceled at Great Basin College or any of the GBC centers this information will be posted on the GBC website as well as text message being sent out to all students that have agree to this form of information distribution.

Student Messages – General Emergency
Great Basin College, in compliance with the Clery Act, will issue timely warning notices in the event a situation occurs on one of our centers or in the areas adjacent to our centers that constitutes a potential ongoing or continued threat to students, faculty and staff. Timely warning notices will be issued upon the recommendation of the Director of Environmental Health, Safety & Security (EHS&S), the Center Director or the local Police agency. Timely warnings will be issued on a case-by-case basis when approved by the GBC Executive Administrators based on the available facts, the risk to the center community, and the risk of compromising law enforcement efforts.

Timely warnings will be issued via the GBC email system, posted on the homepage of the GBC web site, posted via video signage, printed notices and personal contact. Warnings will include the date, time and reported location of an incident, a brief summary of the incident, a description of the suspect(s) and vehicles if known. Warnings will include safety information specific to the type of incident and contact information to obtain additional information.

Terrorist Attack
If the State of Nevada’s Office of Homeland Security places the Elko area in a level red alert, students in the clinical education sites will be released from clinical until the red alert has been lifted. GBC faculty or staff approval to leave the clinical education site is not required.
Student Records
The Admission and Records Office maintains official GBC files for all students who apply to the college. A cumulative, confidential file of paramedic program documents is kept for each student in the Health Science and Human Services Department. The confidential file contents may include: paramedic application materials, immunization records, copies of the CPR card, transcripts, student agreements, test scores, clinical assignment and performance forms, skills checklists, Notification of Unsatisfactory Progression forms, Practice Lab Remediation forms, and action plans (if applicable). Class work, tests, quizzes and projects may also be included in this file. Records of individual student conferences will be read and signed by the student and faculty prior to becoming a part of the student’s cumulative record. Records are retained and stored in the Health Science and Human Services Department for five years and are then shredded.

Students will need to provide documentation regarding the completion of their immunization, annual background check, annual drug screen, required training and related compliance records as requested by clinical facility. GBC uses a vendor called Complio by American DataBank to help students track, access, and maintain their compliance records through their academic program. **Students will need to complete the Clinical Rotation Package, Background Check, Drug Screening and Immunization Tracking.** Students are required to maintain compliance before enrollment is granted. The required immunizations are MMR series, Hepatitis B series, negative two step TB test within last 12 months, Tdap, and Influenza. Students are also required to upload a CPR card from American Heart Association, and Health Insurance.

All student files are maintained in designated, locked file cabinets. Student files are protected under the Family Educational Rights and Privacy Act of 1974 (FERPA). For further information, refer to the section on Family Educational Rights and Privacy Act in the GBC catalog.
Physical Examination
All AAS students must provide evidence of a satisfactory physical examination within six weeks of the start of the fall semester (between July 1 and August 20), validating that they are able to meet the demands of the program without compromising the patient or themselves. In addition, the following psychomotor requirements must be validated:

1. Assess clients through auscultation, percussion, palpation, and other diagnostic maneuvers.
2. Manipulate equipment necessary to assist the individual, family and/or group to desired outcomes.
3. Lift and move individuals and/or groups of individuals to provide safe care and emergency treatment.
4. Perform cardiopulmonary resuscitation.
5. Perform independently of others.
6. Possess cognitive abilities to measure, calculate dosages, reason, analyze and synthesize.

Immunizations
The following immunizations must be current. You can obtain any required immunizations from your physician/physician’s assistant or nurse practitioner. Any immunizations that are still current do not have to be repeated.

Two-step tuberculosis (TB) skin test
Be sure you receive the two-step Mantoux or PPD. (This baseline is valid for 12 months. One-step renewals can then be done each 12 months thereafter.)

Step One: Go to your physician’s/physician assistant’s/nurse practitioner’s office or a clinic and have the skin test done; return 48-72 hours later to have it read.

Step Two: One week later, go back and have the skin test done again; return 48-72 hours later to have it read. A tine test is not acceptable, and the one-step TB test is not acceptable. If you have had a positive skin test in the past, you must have documentation of a negative chest x-ray.

Measles/mumps/rubella (MMR)
(Series only to be done once in a lifetime.)

a. If you were born in 1957 or after and have no serological evidence of immunity, no physician-diagnosed measles or mumps disease, or prior vaccination evidence, obtain two doses of MMR vaccinations.

b. If you were born before 1957, show proof of one of the following:
   - history of physician-diagnosed measles and mumps disease
   - laboratory evidence of measles and mumps immunity
   - laboratory evidence of rubella immunity
   - MMR or Rubella vaccination evidence

Tetanus, diphtheria, pertussis
A Tdap booster is required every 10 years following the completion of the primary 3-dose series. A 1-time dose of Tdap to those younger than 65 years of age who have direct patient contact is required.

Hepatitis B series
The Hepatitis B series is a series of three immunizations. If you have not been previously immunized, the first immunization must be completed by the end of July, the second completed one month after the first, and the third immunization completed five months after dose #2. Check with your health care provider if you have questions.

Note: Hepatitis A series: Currently, clinical facilities do not require immunization for hepatitis A; however, it is highly recommended due to exposure at various clinical sites. This is a series of two immunizations. If you have not been previously immunized, the second dose should be completed 12-18 months after the first. If the combined hepatitis A and hepatitis B vaccine (Twinrix) is used, 3 doses at 0, 1, and 6 months; alternatively, a 4-dose schedule may be used, administered on days 0, 7, and 21-30 followed by a booster dose at month 12.)
**Influenza**
Proof of immunization with vaccine(s) recommended for health care providers by CDC for the current year.

**COVID-19 vaccinations**
Proof of immunization with vaccine(s) recommended for health care providers by CDC or
Exemption form filled out for **ALL** clinical locations assigned to for rotations, if allowed, and approved by clinical location and program director. (see exemption information below)

**Exemptions**
Note: There are two types of exemptions to the immunization requirements.

**Medical** – this exemption requires a licensed physician to provide a signed statement that a medical condition prevents the student from complying with this regulation.

**Religious** – this exemption requires a statement from the student that the vaccines are contrary to his/her religious beliefs.

It is the student's responsibility to ensure that all requirements are up to date. Failure to complete the requirements by the established due dates will result in the inability for the student to attend scheduled clinical activities and may result in a delay in completing the paramedic program or dismissal from the paramedic program.

*The paramedic program and/or clinical site reserves the right to restrict clinical placements of students who are not fully immunized for any reason.*

**Insurance**

**Health Insurance**
Students are required to have health insurance throughout their tenure in the paramedic program. If you are not covered by health insurance, a student plan is available. Proof of health insurance will be documented in the student’s record and is required by the start of the academic year.

**Liability Insurance**
Paramedic students are covered by the Nevada System of Higher Education’s liability insurance.
Paramedic students may purchase their own liability through various companies on an annual renewal basis.

**CLINICAL AGENCY DISCLAIMER**

*While assigned to clinical agencies, students are not considered employees of the agency and will not be covered by Workman's Compensation, or malpractice insurance policies of the agency. Students must abide by existing rules and regulations of the Clinical Agency during their clinical assignments.*

**Background Reports and Drug Testing**

Clinical affiliation agreements require that Great Basin College must assure that its students participating in all clinical/practicum rotations shall have a background and drug screening report completed. These reports will be done prior to admission to the Paramedic Program with results disclosed to the participating clinical facility/agencies. If requested by the clinical facility/agency, Great Basin College students may be asked to submit to “for cause” drug and/or alcohol screening in a similar manner and under policies similar to those affecting employees of the participating clinical facility/agency. The results of the drug and/or alcohol screening may be disclosed in the event of a claim against the clinical facility/agency arising out of the acts of the student.

**Substance Abuse**
Great Basin College maintains a zero-tolerance position in regard to the use, sale and possession of any illegal drug. Violation of any state or federal drug laws will subject the student to disciplinary action, which may include legal action concurrently. Illegal use or abuse of legal and/or prescription drugs will subject the student to similar disciplinary action.

**Philosophy:** Faculty believe safety for the student and patient is of the utmost concern. Faculty believe personal and health problems arising from substance use can affect academic and clinical performance, making students a danger to self and patients. Faculty are committed to confidential handling of recognition and treatment of substance use/abuse.

**Illegal Drugs:** For purposes of this policy, ‘illegal drugs’ means illegal use of controlled or illegal (i.e. prohibited) substances: any drug defined as such under the regulations adopted pursuant to Nevada Revised Statutes 453.146. Many of these drugs have a high potential for abuse. Such drugs include, but are not limited to, heroin, marijuana, cocaine, PCP, and "crack." They also include "legal drugs" which are not prescribed by a licensed physician. The definition of illegal drugs does not mean prescription drugs that are lawfully being taken by a student as prescribed by a licensed health care professional; the student must be under the direct medical care of the licensed health care professional. Although marijuana is legal in the State of Nevada, marijuana is a Schedule 1 substance under federal law and continues to be an illegal substance for purposes of this policy; thus, its use is prohibited. In addition to other illegal drugs as described above, the overuse and/or abuse of alcohol is also prohibited under this policy.

**For Cause/Reasonable Suspicion Testing:** If requested by the clinical facility/agency, Great Basin College students may be asked to submit to “for cause” drug and/or alcohol screening in a similar manner and under policies similar to those affecting employees of the participating clinical facility/agency. The results of the drug and/or alcohol screening may be disclosed in the event of a claim against the clinical facility/agency arising out of the acts of the student.

If faculty has a reasonable suspicion that a student is using illegal drugs or is demonstrating signs of impairment while engaged in college-related activities, faculty must immediately remove the student from the classroom, laboratory, or clinical environment. If reasonable suspicion exists faculty may ask the student to submit to “for cause” drug and/or alcohol screening at the student’s expense. Great Basin College is responsible for identifying and providing safe travel to and from a designated vendor for the testing/screening. If a student refuses to submit to a reasonable suspicion drug and alcohol screening test, the refusal will be considered a presumptive positive/admission of impairment, which poses a risk of harm to self and patients.

**Impairment:** To determine reasonable suspicion, the following factors may be considered, but are not an exclusive list of factors justifying a drug or alcohol screening:

1. The physical symptoms or manifestations of drugs or alcohol use and impairment such as altered or slurred speech or repeated incoherent statements, disorientation, chronic drowsiness and/or sleepiness, dilated or constricted pupils, flushed skin, excessive sweating, tremors of the hands, excessive drowsiness or loss of consciousness;
2. Unexplained, abrupt or radical changes in behavior such as violent outbursts, hyperactivity, extreme suspiciousness, frequent and/or extreme fluctuations of mood swings without explanation, deteriorating hygiene/appearance;
3. Inability to walk steadily or in a straight line, or perform normal manual functions essential to clinical treatment without reasonable explanation;
4. Accident or “near misses” in a clinical environment that appear related to unexplained sensory or motor skill malfunctions;
5. Perceived odor of alcoholic beverages or marijuana
6. The direct observation of drug use or alcohol use immediately prior or during program related activities
Students who have a medical condition, injured, or taking any substance that impairs judgment (including prescription medications, medical marijuana, and alcohol) are not suitable for and cannot be present in the clinical environment where patient safety is the topmost concern.

*Faculty must document student characteristics that warrant reasonable suspicion.

**Positive Drug Test Results/Sanctions:** All students must satisfactorily pass any required drug test at the time of admission as well as when requested by program for cause/"reasonable suspicion". A refusal to undergo a drug screening test will be considered a presumptive positive.

Students who do not pass a required drug test will face disciplinary action, including rescinding of their admission, administrative withdrawal from courses, placement on a leave of absence, or dismissal from the academic program. Students should be provided with resources for counseling services for evaluation and treatment. Any costs incurred or required as part of a treatment program or ongoing monitoring are the responsibility of the student.

**Program Re-Entry:** Students re-entering the program after receiving disciplinary action for a positive drug and/or alcohol screening test will be required to submit to a drug screening test prior to re-entry. Documentation or counseling and/or physician acknowledgement of prescribed medications and presumed safety in the clinical setting may also be required.

**Bloodborne Pathogen Exposure and Prevention Policy**

Standard Precautions must be used by students and faculty in all clinical facilities and the Practice Lab at all times. Current CDC Recommendations for Application of Standard Precautions for The Care of All Patients in All Healthcare Setting are available at:

The Paramedic program has developed a Bloodborne Pathogen Exposure and Prevention Policy to be in compliance with the Occupational Safety and Health Administration (OSHA) Standards. The policy is intended to provide direction to students and faculty to help prevent exposure to bloodborne pathogens and guidance should such exposure occur. (See Appendices Section for policy and form).

**Health and Injury Policies**

**First Aid, Accidents, and Injuries:**

1. A student who is injured in a clinical facility during a clinical course must report the incident to their instructor immediately. If indicated, the student will be seen in the hospital emergency room at no expense to the clinical site. The decision to send the student to the emergency room will be made by the faculty, student, and AAS Health and Human Sciences Dean, if indicated.
2. In the event of a student injury in a paramedic classroom, the Practice Lab, or in a clinical agency, the **student and faculty must also complete the Associate Degree Paramedic Program Injury Report form** (see Appendices Section) and submit it to the AAS Health and Human Sciences Dean. If an injury occurs in a clinical agency, the student and faculty **must also adhere to the agency's injury policies** and complete any reports or forms required by the facility.
3. All Elko site safety and security officers are CPR and first responder trained. The security patrol vehicles contain first response/emergency accident response equipment. For minor injuries each building is equipped with a first aid kit, which the responding staff may use to take care of the injury.
4. An Automatic External Defibrillator (AED) is located at all GBC locations: Elko: in the Health Science building hallway by the front offices; Pahrump: in the main office; Winnemucca: in the main office.
**Other Health Policies and Information**

1. The paramedic program requires clinical work performed in hospitals and other facilities that involves providing direct care or exposure to clients with a variety of illnesses and diseases, including the handling of and/or contact with human body fluids. Therefore, students should understand that they may or will be exposed to disease-carrying bacteria and microorganisms and come in contact with patient situations that could be hazardous to individuals who are pregnant or immune compromised.

2. Students who have a latex allergy must inform their instructor at the beginning of each semester so arrangements can be made to protect the student from exposure.

3. After hospitalization, surgery, serious illness, injury, childbirth, etc. a student must submit a release statement from a health care provider indicating their medical clearance to return to full time status to the paramedic program. A copy of this medical release statement will be placed in the student’s file.
Essential Eligibility Guidelines for Participation in the AAS AND Certificate of Achievement Paramedic Program

The functional abilities adopted by Great Basin College’s AAS & Certificate of Achievement Paramedic Program are generally accepted norms common to paramedic, nursing, and radiology programs.

The functional abilities refer to those cognitive, affective, and psychomotor abilities and competencies required for satisfactory completion of all aspects of the paramedic program. These functional abilities are non-domain specific (i.e., physical and mental activities and attributes needed by a paramedic to practice safely in terms of essential paramedic functions, with or without accommodations). Applicants to the AAS and Certificate of Achievement Paramedic Program and students continuing through the paramedic program must demonstrate competence in the following categories of behavior in order to successfully meet program learning objectives:

<table>
<thead>
<tr>
<th>Physical Abilities</th>
<th>Cognitive Abilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gross motor skills</td>
<td>Reading</td>
</tr>
<tr>
<td>Fine motor skills</td>
<td>Arithmetic</td>
</tr>
<tr>

</tbody>
</table>

Policies and Guidelines for Nondiscrimination for Disability

Great Basin College is committed to providing equal educational opportunities to qualified students with disabilities in accordance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973. A qualified student must furnish current verification of disability. The Students with Disabilities Office, located in Berg Hall, will assist qualified students with disabilities in securing the appropriate and reasonable accommodations, auxiliary aids, and services. For more information or further assistance, please call 775.327.2336.

Procedure for Accommodation on the Basis of Disability

The ADA Officer will assist qualified students with disabilities in securing the appropriate and reasonable accommodations, auxiliary aids and services. Questions regarding appropriate accommodations should be directed to the GBC’s ADA Officer in Elko at 775.327.2336.

Sexual Harassment

The Nevada System of Higher Education (NSHE) is committed to providing a place of work and learning free of sexual harassment. Where sexual harassment is found to have occurred, the NSHE will act to stop the harassment, to prevent its recurrence, and to discipline those responsible in accordance with the NSHE Code or, in the case of classified employees, the Nevada Administrative Code. Sexual harassment is a form of discrimination; it is illegal.

It is expected that students, faculty and staff will treat one another with respect. Refer to the GBC general catalog for the entire policy. Each case of accused sexual harassment will be reviewed on a case-by-case basis.

GBC Academic Regulations

All faculty and students are responsible for following the Great Basin College regulations and guidelines as printed in the Great Basin College Catalog 2022-2023.
Academic and Professional Dishonesty

Academic dishonesty ("cheating") involves all methods or techniques that enable a student to gain unfair advantage in the clinical or classroom setting (see the Great Basin College Catalog for the definition of cheating in the Academic Honesty section). Cases of academic dishonesty ordinarily result in a grade of F for the assignment and/or the course, in accordance with published course policies. The violation may lead to the student’s dismissal from the Great Basin College Paramedic Program and, in some cases, dismissal from Great Basin College. GBC and NSHE policies and procedures related to student conduct and academic honesty will be followed. Academic and/or professional dishonesty may occur in a variety of situations, including but not limited to the following:

Individual Assignments, Quizzes, Tests, and Examinations: copying from a neighbor’s paper during the exam (quiz or test); talking or sharing information during an exam; using crib notes when taking a closed book examination; arranging for another person to substitute in taking an examination; giving or receiving unauthorized information when taking an examination.

Plagiarism: Plagiarism is knowingly representing the work of another as one’s own, without proper acknowledgement of the source. The only exceptions to the requirement that sources be acknowledged occur when the information, ideas, etc., are common knowledge. Plagiarism includes, but is not limited to, submitting as one’s own work the work of another person or work obtained from a commercial writing service; quoting directly or paraphrasing closely from a source (including the Internet) without giving proper credit; using figures, graphs, charts, or other such material without identifying the sources.

Faculty expects that students will demonstrate professional and academic integrity at all times. Faculty will explain their course expectations and students are expected to ask questions when clarification is needed.

Essential Skills

Effective communication involves the ability to employ therapeutic communication techniques and appropriate interpersonal relationship skills during interactions with instructors, clients, family members, and groups of individuals including health care team members, peers, and supervisors.

Critical thinking is a reasoned, interactive and reflective process focused on deciding what to believe or do. Critical thinking involves the ability to identify and challenge assumptions, the ability to explore and imagine alternatives, as well as the ability to make judgments based on evidence (i.e., fact) rather than conjecture (i.e., guesswork).

Critical Behaviors

Accountability is the state of being responsible for one’s individual behaviors and their outcomes when assuming the professional role. Accountable means being attentive and responsible for the health care needs of the individual, family, or group. The faculty believe the initial groundwork for accountability is laid during the first semester and continues throughout the student’s professional career. Ideally, continued education experiences strengthen the student’s ability to further explore, analyze, and test one’s functioning relative to accountability.

Collaboration is defined as the intentional act of a professional’s background and commitment to respond to problems as a whole are essential. Fundamental to the concept of collaboration is the ability to independently communicate and make decisions in support of the individual, family, or group.

Self-leadership can be described in terms of an individual having a positive self-regard which consists of knowing one’s strengths and weaknesses, allowing oneself to be challenged and strengthened through goal setting, and understanding the fit between one’s ability to contribute to the organization and the organization’s needs. Self-leadership is also the influence that individuals have over themselves to regulate, manage, direct, and/or control their own behavior.
Great Basin College Student Conduct Policy

All students are held accountable for their behavior under GBC’s *Standards of Conduct for Students* located in the college catalog and NSHE Code, Title 2, Chapter 6, Section 6.2.2 regarding misconduct. Paramedic students are also responsible for additional standards of conduct for paramedic professionals (see Appendices Section).

Written Paper Expectations and Format

The American Psychological Association format is required for written papers. Citations and references used in any assignment should be written in APA format.

Faculty expect papers and other written assignments to be written at a college level and to reflect professional communication. Detailed written expectations can be found in the document titled *Writing Expectations for Great Basin Paramedic Students* in the Appendices Section.

Textbooks and Other Course Materials

Textbooks may be purchased at the Great Basin Book Store, 1500 College Parkway. Elko, NV 89801 (775) 753-2270. Students may purchase through the website at: http://www.bkstr.com/CategoryDisplay/10001-9604-10075-1?demoKey=d

Students also have the option to purchase books through outside sources.

Syllabi are available online on individual WebCampus course websites the day the course starts.

Grading

The following grading scale will be applied to all nursing coursework:

<table>
<thead>
<tr>
<th>Score Range</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>100 - 94.00</td>
<td>A</td>
</tr>
<tr>
<td>93.99-90.00</td>
<td>A-</td>
</tr>
<tr>
<td>89.99-87.00</td>
<td>B+</td>
</tr>
<tr>
<td>86.99-84.00</td>
<td>B</td>
</tr>
<tr>
<td>83.99-80.00</td>
<td>B-</td>
</tr>
<tr>
<td>79.99-77.00</td>
<td>C+</td>
</tr>
<tr>
<td>76.00</td>
<td>C</td>
</tr>
<tr>
<td>93.99-90.00</td>
<td>A-</td>
</tr>
<tr>
<td>75.99-70.00</td>
<td>C-</td>
</tr>
<tr>
<td>66.99-64.00</td>
<td>D</td>
</tr>
<tr>
<td>63.99-60.00</td>
<td>D-</td>
</tr>
<tr>
<td>Below 60.00</td>
<td>F</td>
</tr>
</tbody>
</table>

Note: Student grades will be calculated out to two decimal places (to the hundredth). There will be no rounding up of scores. Criteria for grading will be given to the student in writing at the beginning of each course. It is the student’s responsibility to know his/her grade point average throughout the course.

- Students are responsible for all written/verbal information that is shared in scheduled classes.
- Students must submit all theory or clinical written assignments on or before the day they are due. Students are responsible for complying with assignment submission guidelines as outlined in each paramedic course syllabus.
- It is the policy of the GBC EMS department not to pre-grade any submitted assignment. Once an assignment is submitted, the Paramedic Faculty will review for only a final grade not for re-submission.

Drop/Withdraw Policy

According to GBC policy, if you do not complete the course and/or do not formally withdraw by the set drop deadline, your instructors will automatically assign you a grade of “F” for the course. The drop deadline for each course will be stated in the course syllabus.

Testing Policy

**Course Exams:**
Exams will be taken during prearranged times and dates. Specific information will be provided to students by the faculty member responsible for a particular course. Unless otherwise indicated, all exams will be closed book, timed and monitored.
**Testing Procedures:**

1. All student possessions (backpacks, cellphones, water bottles, hats, etc.) must be left at the front of the room.
2. Students are not permitted to sit at their desk with notes prior to the test. Any last-minute studying must be conducted outside the classroom.
3. The procedure for proctored tests should be as follows:
   a. Students take the test and submit it online.
   b. Students who disagree with the correct answer may complete a Student Test Query Form (see Appendix H-3) to explain their rationale for their chosen answer. These forms will be submitted to the faculty.
   c. There will be no discussion of test items between students and faculty on the day of the test after the test is completed.
   d. If a student is absent from a test, it will be up to the discretion of the instructor as to whether the same test may be used to make-up the test or a different test will need to be administered. A different test may be of a different format as well (essay, short answer, etc.).
   e. Simple, non-graphing, calculators without memory can be used for dosage calculations if necessary. No cell phones are permitted.

**Online Testing Procedures:**
- All tests will be scheduled in advance utilizing EMSTesting.com. This will include unit exams, midterms, and finals.
- You will be given 1 minute per question to complete the test.
- The tests will be available five (5) days during final exam week.
- You will be required to take tests at a GBC testing center.

**Reviewing Tests with Faculty:**
- It is at the faculty’s discretion if a group review is conducted. If so, the students will not be allowed to take any notes; they can only review the exam and discuss questions with other students or faculty.
- All students earning less than 76% on any exam at any time during a course (or two exams if so, indicated in the course syllabus) must make an appointment with the faculty to complete a Notification of Unsatisfactory Student Progress form. Students may be required to counsel prior to unsatisfactory exams per the discretion of the instructor.
- The faculty will discuss with the student the results of the test and assist the student with strategies for improvement on the next test.
- Students who do not follow this policy will be contacted by the faculty for a discussion of the importance of remediation for success in the paramedic program.
- Once a student has received three Notifications of Unsatisfactory Student Progress forms within one semester or a total of four over the course of the paramedic program, they will be required to appear before the Admissions and Progressions committee to determine progression in the program and discuss individual plan for progression.

**Medication Dosage Exam Process**

The exam format will be paper and pencil. Simple, non-graphing calculators will be permitted during the exam. Use of a basic calculator is permitted. Students may miss one question on this exam. Students will have three chances to pass this exam. After the second failed exam, the student will receive a Notification of Unsatisfactory Student Progress and will be required to repeat the modules and corresponding post-tests before their third attempt. If the student fails their third attempt, they will appear before the Admission and Progression Committee.

**Medication Dosage Calculations Testing**

Students will be required to pass a dosage calculation exam each semester. These will be short paper and pencil exams that will be scheduled by the instructor during the skills week. Students will take the dosage calculation exam after completing the required modules and corresponding module post-tests listed below.

Each semester students must pass the medications exams test with a 100%. Additional module post-tests listed will require a 90% pass rate.
Clinical Grading
1. A mid-term evaluation will be completed for EMS 216 and EMS 219. If there are areas of clinical performance that are identified as not meeting satisfactory, a remediation plan will be developed for each individual student.
2. A final clinical evaluation will be done collaboratively by faculty and student. The student must achieve “Satisfactory” performance rating in all competencies on the final clinical evaluation to pass any course with a clinical component.
3. Student also complete varied clinical assignments, a final clinical grade for each course must be a 76% or greater.

Class Attendance
- Attending class is an integral part of the program and critical in successful completion of each course. Whether the class is traditional or virtual in its delivery, it is EXPECTED that each student ATTEND ALL CLASSES and arrive for class ON TIME. For online conferences, students should be logged in 5 minutes before the conference begins.
- Due to the hybrid nature of the course, in person skills days will be scheduled for up to three (3) full days at a location to be determined in Nevada. These days are essential to your success in the program and are mandatory. Failure to attend these skills days will result in your dismissal from the program.
- In the event of an absence, it is the student’s responsibility to obtain the announcements, information and any handouts provided by the instructor. Except for emergencies, missed tests, quizzes, or class work (random or scheduled) may NOT be made up.
- Students with a pattern of absences from class (i.e., emergency or otherwise), will receive a Notification of Counseling from the instructor. Any subsequent absences may be referred to the Admission and Progress Committee and evaluation by the Department Dean.

Civility in the Classroom
Successful learning experiences require mutual respect. The faculty has primary responsibility for and control over classroom/clinical behavior and maintenance of academic integrity. Student behaviors that demonstrate civility include:
1. Arriving for class/clinical early and/or on time.
2. Treating everyone in class or clinical with courtesy and respect.
3. Refraining from packing up belongings before class/clinical ends.
4. Turning off all electric devices that could cause disruption to the class or clinical area.
5. Being quiet and giving full, respectful attention while the faculty or another student is speaking.
6. When speaking, using courteous, respectful language and keeping comments and questions relevant to the topic.
7. Following any additional classroom rules established by individual faculty.

GBC Cares - a guide to engaged learning
- Civility — have respect for others: students, faculty, staff, and the campus community. Be respectful, polite, and considerate in any classroom, live or digital.
- Active — embrace the active process of learning. To maintain a class environment that is conducive to learning: Be diligent, engaged, and committed.
- Responsibilities — you are accountable for your actions, work, words, and behavior. Courteous behavior and responses are expected: Be honorable, conscientious, truthful, and dependable.
- Excellence — in the classroom, optimizes an atmosphere of teaching and learning. Classroom discussion is meant for everyone’s viewpoint to be expressed on the topic at hand. All students should be afforded the courtesy and opportunity to be heard: Be exceptional.
- Success — successful college students embrace all of the educational experience and welcome diversity and different ideas. Embrace challenges.
Great Basin College states: “messages, attitudes, or any other form of communication deemed outside the bounds of common decency/civility as judged by common standards of classroom behavior (determined as they would in a regular classroom by the instructor) will not be tolerated.”

At GBC, students are expected to assist in maintaining a class environment that is conducive to learning. It is required that students conduct themselves in a manner that does not disrupt the teaching or learning atmosphere. All classroom participants have the responsibility to maintain classroom and online discussions that are civil and not disruptive by being courteous and using respectful language. This courteous behavior continues beyond the classroom to any community interactions as a GBC paramedic student.

Be an engaged learner and encourage your fellow students to do so as well.

ANY STUDENT ENGAGING IN INAPPROPRIATE BEHAVIOR WILL BE REMOVED FROM THE CLASSROOM. COUNSELING MAY OCCUR WITH THE FACULTY AND OTHER DEPARTMENT OR GBC PERSONNEL. REFER TO STUDENT CONDUCT POLICIES IN GBC GENERAL CATALOG.

Informal Academic and Behavioral Counseling Forms
This informal counseling process allows for faculty and students to discuss any concerns in relation to a student’s academic, clinical, professionalism and or behavioral performance. This provides faculty and students an opportunity to make suggestions for issues of concern to help improve performance and is not punitive. The forms serve as documentation that the faculty has met with the student and includes recommendations and feedback. A copy of the form is given to the student and placed in the student’s file for documentation. If there is ongoing concern or if a pattern of academic, clinical, professional and/or behavioral misconduct continues, a Notification of Unsatisfactory Progress will be warranted.

Unsatisfactory Student Progress Policy
Students who are admitted to the AAS and Certificate of Achievement Paramedic Program must maintain their status as a student in good standing in both academic and academic-related areas based on the following criteria. Failure to do so may result in dismissal from the program:

Unsatisfactory Progress for Academic Reasons
Students must meet with faculty member(s) to complete a Notification of Unsatisfactory Student Progress form based on the following:

1. who are not maintaining a minimum average of 76% on clinical or academic assignments,
2. who have not met expected performance, safety, or conduct standards,
3. earning less than 76% on any exam at any time during a course, or two exams if so, indicated in the course syllabus,
4. who earn less than 76% on one to three course quizzes or as indicated in course syllabus,
5. who do not pass a skills checkoff after two attempts,
6. who at the end of the course do not meet the final clinical evaluation competencies, (this will also result in a student not passing the course).

Unsatisfactory Progress for Academic-Related Reasons
Conduct consistent with professional standards of ethical, academic, and clinical behaviors must be exhibited at all times, including within classrooms. See Appendices Section for additional information on what constitutes inappropriate conduct in these areas.

1. In a clinical course, if a student’s performance is determined by paramedic faculty to be unsafe, the student may be removed from the clinical setting and given a failing grade for the course prior to the end of the semester.
2. If at any time a student’s observed behavior or performance raises any questions on the part of paramedic faculty about the student’s physical, emotional, cognitive, and/or emotional status and/or ability to perform or
behave safely and/or appropriately, the faculty will meet immediately with the student, document their observations and notify the Dean. A student may be asked to leave a clinical or classroom setting, if the paramedic faculty determines it is warranted. When appropriate, site security or its equivalent in clinical settings may be called, in addition,

3. If the student is determined to be unable or unwilling to perform or behave appropriately, the student’s emergency contact will be notified. The student’s emergency contact is responsible for taking the student home.

**Unsatisfactory Progress Procedure**

1. Students failing to meet any of the criteria above will receive a written Notification of Unsatisfactory Student Progress (See Appendices Section).
2. Faculty will identify area(s) of performance needing improvement in either academic or academic-related (clinical work) and outline recommendations and suggest an action plan for improvement. Students will also provide input for an action plan. Documentation of poor performance must be included with the unsatisfactory student progress form.
3. Faculty should review the tracking worksheet to determine if the student is required to meet with the Admission and Progression Committee. If so, the instructor should immediately contact the Admission and Progression Committee Chair, to obtain next meeting information and request that a letter from the Chair be prepared for the student to appear at the next meeting.
4. The completed form will be signed by faculty member(s) and student.
5. Completed Unsatisfactory forms will be given to the Administrative Assistant.
6. The Administrative Assistant will also add the student’s appearance to the next Committee meeting agenda, if required.
7. Faculty will be responsible for copying the completed form for the student.
8. The Administrative Assistant will file the completed form in the student file.
9. The Administrative Assistant will ensure that a letter has been mailed/delivered to the student if Committee appearance is required.
10. The Administrative Assistant will also add the student’s appearance to the next Committee meeting agenda, if required.

The Admission and Progression Committee will review a student's academic or clinical performance to determine if the student can continue progression in the program or is dismissed from the program. Students may at any time be referred to the Admission and Progression Committee for serious infraction(s) of professional, academic, or academic-related performance.

1. Students who receive three (3) Notifications of Unsatisfactory Student Progress forms within one-semester must meet with the Admission and Progression Committee.
2. Students who receive a total of four (4) Notification of Unsatisfactory Student Progress forms over the course of the AAS or Certificate of paramedic program must meet with the Admission and Progression Committee.
3. Upon receiving the sixth (6) Notification of Unsatisfactory Student Progress at any time during the paramedic program, the student will be dismissed from the program without appearing before the Committee. Students who are reentering the program at any point in the semester will only be able to receive five Notifications of Unsatisfactory Student Progress. See below (pg. 38) for Notification of Unsatisfactory Student Progress limitations for readmitted students.

**Process for Admission and Progression Committee Review**

One of the responsibilities of the Admission and Progression Committee is to review student academic problems referred by faculty and on matters related to progression, dismissal or reinstatement of students. The purpose and functions of the Admission and Progression Committee can be found in the Appendices Section.

1. All students undergoing review by the Admission and Progression Committee must submit a one-page study plan to the Committee outlining their plan of action for improvement. The plan must be received by the Administrative Assistant at least one (1) day prior to the next scheduled meeting of the Admission and Progression Committee. Study plans will not be accepted the day of the committee meeting.
2. The committee will review the student's course grades and overall academic and academic-related (clinical/skill performance) record, the course faculty's evaluation, and the student's written plan for improvement. Course faculty whose students are undergoing review by the Admission and Progression Committee are requested to be available to consult with the committee if needed during the review.
3. The Admission and Progression Committee reviews all the information received and recommends to the Chair that:
   a. The student shall implement their plan for improvement and be allowed to continue in the program. The Committee may require additional steps or conditions the student must meet after reviewing the student's plan for improvement.
   b. Or, to the Dean if: The student should be dismissed from the program.
4. A student who is requesting to voluntarily withdraw must submit a letter to the Admission and Progressions Committee. The Admissions and Progressions committee will make a recommendation for the student's progress to be readmitted back into the program if the student files a request to do so.

Voluntary Withdrawal
Students who for personal reasons need to voluntarily withdraw from the program must immediately notify their instructor(s) and the Admission and Progression Committee in writing. Students have the option of withdrawing from a paramedic course prior to completion of 60% of that course (specific date disclosed in the syllabus). It is the student’s responsibility to formally withdraw at the Registrar’s office from a course. After that date, a grade of “F” will automatically be assigned as per Nevada System of Higher Education Board of Regent’s Policy, Chapter 6.

Transferring to a Different Clinical Site
Transfer to a different clinical site will be allowed after the successful completion of the first 4 weeks of the clinical rotation course (EMS 216 or EMS 219). Granting a transfer will be based upon the availability of a student spot at the desired site. The transferring student must complete the required orientation to the health care facility where the hospital or EMS clinicals take place and submit all documentation of this requirement to the Health Sciences and Human Services Administrative Assistant and program director no later than the second week of the current semester or block course prior to the start of week four of the course dates.
If these requirements are not met, the transfer will be forfeited.

Dismissal and Readmission/ Re-Entry to the Program
1. Students who have failed either the theory or clinical component of a paramedic course, which results in a grade less than 76% or have not met final clinical evaluation competencies, will be dismissed from the program and may not continue with other paramedic courses for the semester.
2. Students will be dismissed for six Notifications of Unsatisfactory Progress. Students who have been readmitted to the program after the first semester will be dismissed for five Notifications of Unsatisfactory Progress.
3. Students who are dismissed will receive an administrative withdrawal (W) for all current paramedic courses in the semester of withdrawal. Refunds are dependent upon GBC policy and course drop dates.
4. Students returning to the program at any time are expected to submit all newly developed assignments. Using previously submitted work is considered plagiarism and may result in a Notification of Unsatisfactory Progress or dismissal from the paramedic program.

Students who have been dismissed from the program may apply only once for program readmission to return to the program. Readmission is defined as re-starting the program from the first semester and re-entry is returning to the program in any other semester but the first. The student must indicate in writing through email or a letter sent to the Health Science Department attention to the Dean their desire to be considered for readmission return to the program no later than May 31 for Fall readmission to the program or re-entry to first semester and January 2nd for Spring re-entry to second/third semester. The student must meet all required specifications for re-entry/return to the program as stated below along with any additional remediation recommendations made by the Admission and Progression committee upon dismissal from the program. All requirements and recommendations must be completed by the date specified by the Admission and Progressions committee.
Students who have been out of the program for more than one academic year must re-apply to the paramedic program. Students who have been out of the program for less than one year and are completing the readmission process will be accepted upon successful completion of the readmission criteria. Students have the option to restart the program in the first semester (readmission) if they chose not to participate in the readmission testing process to be placed beyond the first semester. A student must have successfully completed first semester to request readmission.

**Course Failure**
Students who have failed any paramedic course must apply to the Admission and Progression Committee for permission to repeat the course and continue in the program. The student should also describe their plans to maintain clinical competency until the failed course is offered again. If readmitted after failing a paramedic course, students must repeat the entire course, including all components of the course. Two paramedic course failures in any single semester or any combination of semesters will result in automatic dismissal from the program.

If the application to the committee is denied, the student will be dismissed from the program. **Please see procedures for appealing to the Admission and Progression Committee.**

**Readmission to the Program**
Students who have failed any paramedic course will be dismissed from the program and may request readmission through the Admission and Progression Committee. If readmission is granted by the Committee, the student must meet all required specifications for re-entry as stated below along with any additional remediation recommendations made by the Committee. All requirements and recommendations must be completed by the date specified by the Committee.

Students who have been dismissed from the program due to academic reasons may apply once for program readmission. The student must indicate in writing to the Admission and Progression Committee their desire to be considered for readmission no later than May 31 for Fall semester and follow all procedures for appealing to the Committee.

Students who have been out of the program for more than one year must re-apply to the paramedic program. Students who have been out of the program for less than one year will be considered for readmission on a space available basis and will not need to submit a full application. Any student requesting readmission to the program will be required to demonstrate competency in paramedic skills and knowledge prior to returning.

Students are not guaranteed readmission to the program.

**Unsatisfactory Progress after Readmission Limitations**
Students being readmitted to the program in the first semester will be accountable to the same Notification of Unsatisfactory Student Progress limitations as new paramedic students. Students re-entering the program in the second, or third semester will go before the Admission and Progression committee upon receiving two (2) Notifications of Unsatisfactory Student Progress in one semester or a total of three (3) throughout the remainder of the program. Readmitted students will be dismissed from the program upon receiving the fourth (4) Notification of Unsatisfactory Student Progress without an option for readmission.

**Student Appeal of Admission and Progression Committee Decision**
Decisions of the Admission and Progression Committee may be appealed directly to the Dean in writing within 3 working days after written notification of the decision is received. If the issue is not resolved after appealing to the Dean, the student may proceed to Step III of the Grievance Procedure described in the next section.

**Grievance Procedure**
The procedure described here differs from and supersedes the GBC procedure described in the college Catalog. The divergence from GBC policy is justified by the sequential nature of the paramedic program curriculum and the safety and well-being of patients a student may care for.
Students who wish to explore problems that have not been resolved to their satisfaction can initiate the appeal process described below. Because paramedic faculty have an obligation to safeguard individuals, a student in the appeal process might not be allowed to continue in the clinical component of a course until the issue is resolved.

Grievance Procedure Steps

**Step I:**
Schedule an appointment and discuss issue with faculty member(s) within 3 working days of the alleged occurrence. Within 3 working days of the scheduled meeting, the faculty member(s) shall issue a written decision. The decision may be delivered to the student by email, U.S. Mail, or personally delivered.

Resolution  Stop

No resolution  Proceed to Step II

**Step II:**
If the student is aggrieved by the resolution made in Step I, the student may file a written appeal with the Dean within 3 working days of receiving the written decision in Step I. The Dean shall meet with the student within 3 working days of receiving the appeal unless the student requests more time and this request is approved by the Dean. The Dean may invite the faculty member(s) to this meeting. The Dean may permit the student to bring someone to advise the student at this meeting. The Dean shall issue a written decision within 3 working days of the meeting. The decision may be delivered to the student by email, U.S. mail, or personally delivered.

Resolution  Stop

No resolution  Proceed to Step III

**Step III:**
If the student is aggrieved by the decision in Step II, then the student may file a written appeal with the Dean within 3 working days of receiving the written decision in Step II. The Vice President for Academic Affairs will, after reviewing the documentation of the previous steps, issue a written decision which will be the final solution. The decision may be delivered to the student by email, U.S. mail, or personally delivered.

(Note: Dates given in this procedure may be adjusted if the Dean or VPAA is not available due to absence or semester break.)

Appearance Standards

Students are expected to maintain a professional, well-groomed, non-revealing appearance in representation of GBC’s Paramedic Program. Safety and cultural awareness are extremely important considerations in appearance standards. The standards below must be followed by both students and faculty. Students must adhere to any additional standards that may be required by some clinical agencies or faculty.

**Cleanliness/Hygiene:**
Hygiene and personal cleanliness are crucial in presenting a professional appearance and essential in protecting the health of patients, staff, and other students.

- Special care should be taken to avoid body odor and bad breath. Students who smoke should have no detectable order of smoke on their person in clinical settings.
• Hair should be clean and neat for both men and women. Hair should be secured so that it does not fall forward over the face or shoulders. Hair longer than shoulder length should be contained with a clip or elastic band. Only conventional hair styles are permitted. Facial hair must be neatly trimmed and kept short (3/4 inch long or less).

• Use only fragrance-free body products. Perfumes and body fragrances are not permitted.

• Nails must be clean, short, and free of any polish. Artificial nails cannot be worn in clinical areas. This includes wraps, inlays, and decals.

• Gum chewing or tobacco chewing/dipping is prohibited, and excessive makeup is not acceptable.

**Jewelry and Body Art:**

• One small stud earring per ear may be worn. No loop or dangling earrings, bars, or gauges are allowed in clinical settings or the Practice Lab.

• Additional jewelry must be minimal. A watch and one or two small rings are acceptable. Students may be asked to remove rings that may scratch or injure patients, or if it may harbor bacteria.

• No tongue, nose, eyebrow rings, or other visible body piercings are allowed in clinical settings or the Practice Lab. Tattoos and other body art must cover as much as possible in clinical settings.

**Student Uniform:**

1. The uniform and student identification badge are to be worn in every clinical setting and Practical Lab unless otherwise stated in course syllabus uniform requirements.

2. The student uniform consists of a GBC long sleeve or short sleeve student shirt and black or dark blue duty pants. A plain white, black, or gray, cotton knit or polyester short or long-sleeved tee may be worn underneath the GBC student shirt.

3. **Shoes for Clinical Rotations and Practical Labs:**
   a. Ambulance Clinicals or Practical Labs: Duty boots are to be clean and black with black shoelaces and worn to all EMS/Ambulance/Fire clinical rotations. Duty boots are required to have a safety toe, composite, or steel toe per clinical rotation requirements.
   b. Hospital Clinicals or Practical Labs: Black, gray, white, or brown and clean athletic shoes, with minimal colored decorations, are acceptable. Canvas or open toed shoes are not acceptable.
   c. Black, brown, or white shoes or Black Duty boots are required while wearing the GBC Paramedic Student uniform.

4. The uniform should be washed daily to prevent cross infection/contamination and to control odors. No headgear or hats are allowed. Clothes should be pressed and in good repair. Do not wear your GBC uniform as your work uniform or your work uniform to GBC clinical rotations.

5. It is essential that uniforms and other attire fit well so it allows effective functioning in the clinical areas. Appropriate underwear is mandatory and at no time should breast or gluteal cleavage be visible.

6. Students are required to have the following equipment for Practice Lab and clinical use:
   a. black ink pen
   b. bandage scissors
   c. wristwatch with a second hand
   d. safety goggles/glasses
   e. pen light
   f. stethoscope
   g. ipad/tablet for documentation

**Judgment of adherence to appearance standards and the appropriateness of any aspect of appearance are at the discretion of the paramedic faculty. Students whose appearance does not meet the state standards may be excluded from participation in clinical and receive an “F” for the day.**
Student Identification Badges

The student identification badge is a required part of the uniform. It is to be worn for every clinical/field rotation unless otherwise stated on the uniform requirements. One student badge is given to the student prior to clinical rotations. If the badge is lost, it is the student’s responsibility to make arrangements for replacement with the Media Services office or the paramedic administrative assistant prior to the students next clinical rotation. A student will be assessed for the cost of the replacement.

A photograph is required as part of the student identification badge. Arrangements will be made for students to have these pictures taken on site at the beginning of each academic year. Only first name and last initial of the student will appear on their badge.

Student Evaluations of Faculty and Learning Outcomes

Toward the end of each paramedic course, students will be asked to complete evaluation instruments. An analysis of the student responses is sent to faculty members after the completion of the term and the recording of grades. This data assists the faculty in self-improvement of their teaching and helping future students achieve course learning outcomes. The information is also used as part of the determination of the faculty member’s tenure and salary increases. Students are expected to carefully weigh their assessments and evaluate the faculty member fairly and accurately.

Gifts

It is the faculty policy that students shall not purchase gifts for them at the end of a particular course. Please adhere to this policy when thanking faculty for their support and guidance.
All paramedic courses must be taken in required sequence. Because of the critical relationship between time and learning, the paramedic faculty believes students must make full use of classroom, lab, and clinical experiences. Students are expected to meet all class, lab, and clinical requirements. Course work not completed will negatively impact student grades. Students are required to seek assistance promptly from the paramedic faculty when and if they experience any degree of academic or clinical difficulty. If personal matters are interfering with academic or clinical efforts, the classroom and/or clinical instructor should be kept informed.

The faculty reserves the right to change certain aspects of the course syllabus, such as the schedule of assignments, grading procedures, or course materials. However, no changes will be made without informing students in a timely and clear manner. It is not anticipated there will be major changes in the content of a syllabus once a course begins.

**Minimum Required Credits for AAS Paramedic**

- **64-66**

The total prerequisite general education and paramedic courses for AAS Paramedic is minimum of 64 credits. Of that total, 46 credits are in paramedic course credits. The total number of clinical contact hours included in the paramedic credits is 14. The program clinical hours total 630 contact hours in clinical settings. These clinicals have specific patient contacts that must be met per CoAEMSP minimum competency requirements.

### Minimum Required Credits for Certificate of Achievement Paramedic

The total prerequisite general education and paramedic courses for the Certificate of Achievement Paramedic is a minimum of 52 credits. Of that total, 46 credits are in paramedic course credits. The total number of clinical credit hours included in the paramedic credits is 14. The program clinical hours total 630 contact hours in clinical settings. These clinicals have specific patient contacts that must be met per CoAEMSP minimum competency requirements.

### Description of Required Paramedic Courses

**EMS 200**

**Fundamentals of Paramedic Medicine**

This course prepares the student to understand the roles and responsibilities of a paramedic in the national standard curriculum. It will cover scene safety and wellness when practicing in the field. The course also provides information on injury prevention and the use of protective equipment needed to protect the paramedic in the field. It will provide the student with an understanding of the medical-legal and ethical issues which will impact them in their career.

**EMS 204**

**Principles of Anatomy & Pathophysiology**

This course prepares the student to understand basic medical terminology, microscopic and gross anatomy and physiology. The course is designed to go beyond what is covered in the anatomy and physiology review of each section in the national standard curriculum.

**EMS 206**

**Principles of Pharmacology/Medication Administration and Venous Access for the Paramedic**

This course prepares the student to understand and to be able to integrate the principles of pathophysiological pharmacology and the assessment findings to formulate a field impression and implement a pharmacologic management plan for patients in the teamwork, considering legal and ethical responsibilities of the paramedic in the management of patients in crisis and at the end of life.
EMS 207  AIRWAY MANAGEMENT AND VENTILATION FOR PARAMEDICS
Students successfully completing this course will demonstrate a behavioral, cognitive, and psychomotor understanding of, and proficiency with, basic and advanced airway management.

EMS 209  PATIENT ASSESSMENT FOR PARAMEDICS
This course introduces the Paramedic student to a comprehensive physical examination and assessment, which includes history taking, clinical decision making, communications, and documentation.

EMS 210  PRINCIPLES OF CARDIOLOGY FOR THE PARAMEDIC
This course prepares the Paramedic student to identify single and multi-lead cardiac rhythms and treat those rhythms considered to be life-threatening with electrical therapy. The skills taught include defibrillation, cardioversion, and cardiac rhythm interpretation. It will also prepare the student to assess, manage, and treat various cardiovascular emergencies that includes ventricular fibrillation, bradycardia, tachycardia, myocardial infarction, cardiogenic shock, pulmonary edema, angina pectoris, congestive heart failure, hypertension, PEA (pulseless electrical activity), and asystole.

EMS 211  PARAMEDIC CARE FOR MEDICAL EMERGENCIES AND ACLS
This course prepares the Paramedic to identify, assess, manage, and treat various medical emergencies. Topics include Neurology, Endocrinology, Allergies and Anaphylaxis, Gastroenterology, Urology, Toxicology, Environmental Conditions, Infectious and Communicable Diseases, Behavioral and Psychiatric Disorders, Gynecological and Obstetrical Emergencies and associated pharmacological interventions.

EMS 212  PARAMEDIC TRAUMA EMERGENCIES
This course prepares the student to identify, assess, manage, and treat various types of trauma emergencies. Topics include Trauma Systems, Mechanism of Injury, Soft-Tissue Trauma, Burns, Head and Face Trauma, Spinal Trauma, Thoracic Trauma, Abdominal Trauma, and Musculoskeletal Trauma. Skills include trauma assessment, splinting, bandaging, spinal immobilization, IV therapy, chest decompression, and associated pharmacological interventions.

EMS 214  PEDIATRICS AND SPECIAL CONSIDERATIONS FOR THE PARAMEDIC AND PALS
This course prepares the Paramedic to identify, assess, manage, and treat age related emergencies, and other special challenges. The student will also be introduced to the concept of assessment-based management. Topics include Neonatology, Pediatrics, Geriatrics, Abuse and Assault, and Patients with Special Challenges.

EMS 215  ASSESSMENT BASED MANAGEMENT AND OPERATIONS FOR THE PARAMEDIC
This course will contain the principles of Assessment Based Management that will teach the paramedic student how to implement a plan for patients with common complaints. The course will also prepare the Paramedic to the concepts of medical incident command, ambulance and rescue operations, hazardous materials, incident, and crime scene awareness.

EMS 216  HOSPITAL CLINICAL EXPERIENCE FOR THE PARAMEDIC
This course allows the paramedic student to apply learned classroom skills and knowledge in the hospital and other clinical care environments. The student will function under the direction of a nurse or physician preceptor.
EMS 219  PARAMEDIC FIELD INTERNSHIP
This course is designed to introduce the paramedic student to Advanced Life Support (ALS) prehospital operations. The student will also become familiar with procedures and care provided by paramedics in the field. Each student will be a third person on a paramedic rescue unit and will work directly with a paramedic preceptor.
HIPAA

The National HIPAA regulations apply in all school settings and students must demonstrate knowledge of the regulations prior to entering the clinical setting. HIPAA training will be maintained with documentation in each student file.

Clinical Assignments

Site Selection:
In planning clinical learning experiences for paramedic courses, the faculty tries to assure that each student is scheduled for the clinical facilities that are most likely to provide a variety of learning situations appropriate to the unit or course content currently being studied. With this in mind, please note that travel to attend a clinical rotation may be required of some students. Clinical site selection is based on the following criteria:

- Type of facility/agency and accreditation status
- Type of experiences available
- Adequacy of staffing and staff preparation for their roles
- Average daily census or clients
- Available equipment, supplies, learning resources, etc.
- Receptiveness to students and faculty
- Number of students who can be accommodated at one time
- Number of faculty to accommodate an additional clinical site

Scheduling and Transportation:

- Scheduling students to be in the right place at the right time for the best possible experiences is a priority for faculty. As a result, there will be occasions when temporary irregularities in a student’s schedule are necessary. Every attempt will be made to notify students of these changes so that they can make necessary plans and adjustments in their personal schedules.
- Paramedic students may be assigned day, evening, or weekend clinical experiences.
- Transportation to clinical facilities is the responsibility of the student.

Attendance:
Clinical attendance is mandatory. Students are required to attend every clinical rotation on the scheduled date and time.

1. Students are expected to report on time for scheduled clinical experiences and be willing, capable, and prepared to participate in assignments. Tardiness is defined as one minute or more past the designated start time. Arriving late for a clinical will result in student being sent home at the discretion of the instructor. Being sent home will result in a grade of zero (0) for that clinical assignment.
2. If a student comes to clinical/simulation/lab unprepared or late, are sent home from clinical/simulation/lab by their clinical instructor or fail to attend a scheduled clinical/simulation/lab the student will be issued a Notice of Unsatisfactory Progress and will be required to complete a make-up assignment worth 50% of the total points of the original assignment that was attached to the missed clinical/simulation/lab.
3. Absences due to illness or other emergencies based on approval may be rescheduled if able or an alternative assignment may be given if rescheduling is not an option. There, is no guarantee that a clinical day can be made up.
4. If clinical is to be missed for any reason, you will need to contact the paramedic department and the clinical area one hour prior if possible, to report time. First, notify the clinical location you will not be in attendance and then send an email to your clinical instructor for the day in addition telephone the paramedic/nursing office at 775-327-2317. If this is before business hours leave a message this should include your name, course you are in, clinical location, and instructor you are leaving the message for. It is the student’s responsibility to notify the faculty and the clinical area of expected absence.
5. Due to concerns of unsafe patient care in a practice setting, a student who works the night shift or the previous eight hours prior to a scheduled clinical experience will be dismissed from the clinical site. This will result in a clinical absence. Please see number 2 above.

**Dress Code and Personal Appearance:**

1. Fingernails are to be cleaned and trimmed to a moderate length not to exceed 1/8” length from the tip of the finger. Neutral nail polish and gel polish will be allowed, and if worn, must be in good repair without cracks or chips. No artificial nails will be allowed, including wraps, fillers, acrylics, tips, tapes, varnish, overlays, nail jewelry and any appliqués other than those made of nail polish are not permitted in clinical. Certain clinical sites may have a stricter policy that supersedes this policy. An immediate compliance with nail length is required.

2. Makeup and jewelry may be worn in moderation, unless the department has specific regulations for safety purposes. No gauged ears. No visible body piercing, tongue piercing, facial piercing or ornamentation is allowed other than moderate (not excessive) ear piercings. Excessive size hoops (greater than 2 inches) are not acceptable. Jewelry may be limited or prohibited in certain patient care areas for safety and infection control reasons.

3. In the interest of providing a professional atmosphere to our patients, tattoos are to be covered to the best of your ability during working hours. This would include covering of arm “sleeves” with long sleeve attire etc. Your clinical site can assist you in addressing particular or special needs.

4. Duty boots or appropriate shoes as defined previously must always be worn and must be clean and in good condition. Flip flops and overly casual sandals are prohibited.

5. Hair must be clean and neatly groomed. Beards, mustaches, and sideburns should be trimmed and neat. No student will be allowed to wear hair colors or extensions (including feathers) of an unnatural hue (i.e. pink, purple, blue etc.).

6. Perfumes, after-shaves should not be worn. Lotions should be used in moderation in order to be considerate of sensitivities, allergies, and illnesses of patients, visitors and clinical employees.

7. Good personal hygiene, to include baths and deodorant, is a common courtesy in health care facilities. Clothing should not smell of smoke or other strong odors.

8. The following are prohibited and cannot be worn to clinical:
   - Sweats, shorts, cargo pants (non EMS duty pants), jogging suits or other athletic apparel.
   - Revealing clothing such as low-cut tops, midriff tops, low riding pants, or see-through clothing (i.e., no visible cleavage, backsides, midriffs, etc.). Tops must be long enough to cover the wearer’s midriff when arms are raised and the backside when bending over.

**Dress Code and Personal Appearance Enforcement:**

- Clinical sites and clinical instructors are responsible for monitoring and enforcing this policy. This includes explaining the dress code to students during orientation, counseling students who are inappropriately dressed and setting a good example for students with a clean, neat and professional appearance. In the event of questions regarding suitability of a particular garment, the Health Science and Human Services Dean may be consulted.

**Authority and Responsibility in Clinical Settings**

- Students are legally responsible for their actions as a student paramedic in clinical settings. The nurse/paramedic working with a student is legally responsible for the patient. Students fall under the legal jurisdiction of their clinical faculty’s license and the college.
- Clinical faculty are responsible for assigning duties, providing opportunities for demonstration of progression, and serving as a guide in achieving objectives. It is necessary that the instructors be used as a guide to facilitate learning.

Students are subject to the rules and regulations defined in the personnel policies of the facilities with which the GBC AAS & Certificate of Achievement Paramedic Program affiliates. It is the student’s responsibility to be aware of the facilities’ policies. If policies are not followed clinical rotation, experiences will be discontinued until there is evidence that the student’s progress meets the criteria for competent clinical performance.
Communication in Clinical Settings
Communication in health care facilities must be on-going. Although students assume responsibility for their assigned patient while in clinical settings, the facility staff nurse does not relinquish total patient responsibility. The student is required to obtain information from the staff nurse regarding a patient before giving care. Prior to leaving the facility or the assigned unit, the student is required to give a report on each patient to the staff/charge nurse or team leader who is responsible for the coordination of care.

Preparation for Clinical Experiences
While doing clinical site patient preparation the student must wear the specified paramedic uniform, unless otherwise specified at the clinical site. Some sites may require the student to don scrubs, gowns, or other PPE at times to manage patient care. A student name tag is required to be worn at all times. The student must identify him/herself to the facility staff and state the purpose for being there. Students must have completed the HIPAA certification and signed the confidentiality agreement prior to reviewing any charts at any facility.

Safe Practice Policy
1. Safe practice in a clinical setting includes those patterns of professional behavior that follow legal and ethical codes of paramedicine and promote well-being of clients and self. This will be demonstrated through accountability in preparation, documentation, and continuity of care, as well as in showing respect for the rights of individuals.
2. Unsafe practice includes those behaviors, which may endanger a patient, family member, staff, peer, or faculty in the physiological, psychological, spiritual, or cultural realm. Specific behaviors of endangerment may include acts of commission or omission in the clinical agency and/or behavior that causes the faculty to question the student’s potential for safe practice.
3. The student whose actions or omissions endanger a patient, family, peer, staff member, or faculty will receive verbal and written documentation of the event. The student may be removed from the clinical setting.
4. Based on the severity and nature of the unsafe practice, the student may receive a failure for that clinical experience, for the course or be dismissed from the AAS Paramedic Program.
5. Documented evidence from faculty, staff, clients, families, or peers may be used in the decision process.

Unsafe Practice Policy
If a student is deemed to be unsafe by clinical faculty, the student will be excluded from clinical rotation, may not self-drop the course, will be assigned a grade of F, and will fail the course. This is applicable at any time during a semester. Behaviors that may result in immediate dismissal include, but are not limited to:
● Performing acts beyond the scope of paramedic practice
● Unauthorized use or distribution of equipment or drugs
● Falsification or alteration of agency documents
● Patient abuse, neglect, or abandonment
● Engaging in criminal activities
● Violation of ethical principles
● Violation of the GBC AAS & Certificate of Achievement Paramedic Standards of Conduct policy

If an agency refuses to allow a student to continue in clinical rotation, the student may not self-drop, will be assigned a grade of F and will fail the course.

Incident and Quality Assurance Reports
● For incidents that occur in clinical facilities and on the GBC site an incident report must be completed per facility policy. Incidents include injuries to a patient, visitor, or staff, and errors in treatment or medication. Facility regulations usually require students to fill out a quality assurance form (incident report) for any untoward happening. Completing the form does not automatically mean a person is responsible for the incident.
● Instructors will refer the student to the appropriate facility or department for incidents that result in exposure or injury. Documentation of the incident will also be recorded by the clinical faculty and kept at GBC.
Most facility incident reports have a section on follow-up that should be regarded as protection for both the patient and the student. Clinical faculty must see all reports prior to being turned in by students.

Failure to report an incident of which the student is aware is a serious error in judgment and a breach of student conduct subject to the faculty issuing a Notice of Counseling.

The policy for reporting medication errors will be strictly followed by any student who has made a medication error.

Skill Remediation
Students who are unprepared when completing a required paramedic skill/procedure in the clinical area will need to return to the Practice Lab for practice and remediation. The clinical instructor will give the student a remediation request slip. If remediation is required, the student must set up an appointment with the Practice lab instructor who will assist in correcting the skill. Students are responsible for having the remediation slip completed prior to the next clinical rotation, and to bring the completed remediation slip to clinical. Failure to complete the remediation prior to the next assigned clinical rotation will result in an unexcused absence from clinical.

Dishonesty in the Clinical Setting
If the faculty determines that a student has been dishonest in representing the facts regarding their clinical assignment, the student may receive a failure for that day, for the entire clinical rotation and/or be dismissed from the AAS Paramedic Program. Examples of dishonesty during clinical instruction include but are not limited to: charting observations or interventions in a client record that, in fact, were not made (i.e., charting vital signs that were not taken); failing to report an error in medication or treatment.

Medication Error Policy and Procedure
1. All medication errors must be reported to the paramedic instructor and staff nurse/paramedic responsible for the patient immediately on discovery of the error. After the patient is assessed, the error will be reported to the charge nurse/paramedic, unit manager and/or the EMS supervisor.
2. Documentation of what medication was or was not given must be properly recorded in the patient’s medical record. Seek guidance from your clinical instructor before documenting in the medical record. This documentation includes the name of the drug, the patient’s response and any interventions.
3. All medication errors should also be documented on the appropriate quality assurance form or equivalent per facility protocol where the error occurred.

Definition of Medication Errors
   a. Medication given to the wrong patient
   b. Wrong medication given to patient
   c. Medication given at the wrong time
   d. Medication given via the wrong route
   e. Medication given in the wrong dose
   f. Medication omitted
   g. Administration of medication not documented properly
   h. Medication administered after patient refusal
   i. Administration of a medication that has already been given
   j. Giving a medication that has been discontinued
   k. Medication left at the bedside without an order to do so
   l. Failure to check physician’s orders or complete necessary assessment interventions prior to administering the medication; For example, failure to: take an apical pulse, take a blood pressure, or check appropriate lab levels
   m. Failure to calculate correct dosages.
   n. Administering medication prior to skills check-off.
4. Medication errors that endanger the patient’s life or cause the patient harm can be grounds for immediate termination from the course.
5. Documentation of medication errors will be maintained in the student’s file.
6. Students giving medications under the supervision of an instructor will still be held accountable for medications errors even if the instructor prevents the error from occurring.
The purpose of the Practice Lab is to provide students with the appropriate environments and equipment to engage in safe, high quality, structured clinical experiences. The lab is designed to:

- Provide a safe and supportive learning environment in which students can become competent in psychomotor and clinical reasoning skills in realistic situations before those skills are applied with patients in actual clinical settings.
- Provide simulated clinical experiences with situations and patients problems not usually available in students’ regular practice sites.
- Model quality and safety in clinical environments reflecting current evidence and best practices.
- Enable reflective practice free from the distractions of normal clinical environments.
- Allow participation in situations and scenarios that are dependent upon interdisciplinary collaboration.
- Provide clinical experiences structured to build confidence and development of increasing complex skills and clinical reasoning competency.

The Practice Lab in Elko is a single location but provides two separate areas in which clinical learning occurs. Those are the Practice Lab itself, and the simulation area, a small portion of the Practice Lab located in Room 101. The Practice Lab is used for learning a wide range of focused clinical tasks requiring specialized procedure and/or equipment. It is considered “low” or “medium” fidelity and provides learning opportunities focused primarily on psychomotor skills.

The simulation area is comprised of highly specialized, high fidelity equipment (simulators) that closely resemble actual patients and patient situations. The simulators (such as SimMan®) are very expensive computer operated, complex electronic equipment that must be programmed and controlled by specially trained faculty or Practice Lab personnel.

**Practice Lab Policies**

Each student will be asked to sign a form documenting their agreement to allow paramedic student classmates to perform procedures on them, including injections and IV insertion.

*The policies described below apply to ALL AREAS of the Practice Lab at all times. An additional set of policies that apply specifically to the simulation area are included later in this document.*

The following rules must be followed at all times in the Practice Lab:

**Strictly Enforced:**

- Only authorized persons are allowed in the Practice Lab and no students can be in the lab without an instructor.
- Children are not allowed in the laboratory under any circumstances.
- Eating and drinking are not permitted in the laboratory at any time.
- No cell phones and other electronic devices may be used the Practice Lab only for the purpose of accessing clinical resources when specific permission has been granted by the Practice Lab Manager and/or course faculty. All electronic devices must always be muted in the lab.
- All accidents, no matter how minor, MUST be reported to the instructor and the Practice Lab Manager.
- No pens are to be used near the simulators.

**Appropriate Use and Behavior for Students in the Practice Lab:**

- Hands must be washed thoroughly upon entering and before leaving the Lab.
- Students must wear lab coats, rubber sole and closed-toe shoes for scheduled sessions in the Practice Lab. GBC paramedic uniform must be worn during skills check-off and simulation in the Lab (see above policy).
- Standard precautions must be practiced at all times.
- Students must come to the Practice Lab with a watch with a second hand and any other equipment necessary to practice and perform a specific paramedic skill.
● All needles and sharps must be properly disposed in SHARPS CONTAINERS (according to CDC guidelines). Students who do not dispose of needles and syringes appropriately will receive a Letter of Unsatisfactory Progress and may be excluded from use of the lab.
● After a learning experience, students should not share details and activities with other students who have not participated in the learning experience.

Scheduling Practice Time in the Lab:
● All students who use any part of the Practice Lab during open lab time must sign in when entering the lab and sign out upon leaving.
● Assigned lab time (e.g., skills check-off, skills demonstration and simulation) is considered clinical time. A student is expected to arrive at the scheduled check-off time ready to demonstrate competency in specific skills. Failure to attend an assigned lab time will result in a Letter of Unsatisfactory Progress and meeting with the instructor. Remediation and/or disciplinary action may also occur.
● Open lab time gives the student additional opportunities to practice paramedic skills. Students are required to sign up for practice and check off of specific, required paramedic skills in the Practice Lab (refer to Skills Check-off List and course schedule). In the event a student is unable to attend any scheduled session in the practice lab, the student must notify the course instructor and Practice Lab Manager at least two hours before the scheduled lab time.
● Students who are tardy will forfeit their time and will need to reschedule their session if space is available. Being tardy for any demonstration, skills check-off or simulation will be considered a clinical absence which will result in a Letter of Unsatisfactory Progress. This might affect the student’s eligibility to participate in a clinical assignment which, in turn, might affect their status in the paramedic program.

Skills Check Offs:
● Students who have failed a skill twice will receive a Letter of Unsatisfactory Progress which will affect their eligibility to participate in a clinical assignment and status in the paramedic program.
● Students are expected to attend their practice lab group session prepared to have a scholarly conversation regarding the content for that session. Faculty are authorized to exclude a student from participation in clinical laboratory sessions when the student is unprepared, when the student is tardy, when performance falls below a competent level, when the Standards of Conduct policy is violated.
● When attending skills check-off the student will be graded pass/fail for each required skill. Grading will include attendance, student preparedness and participation.

Students are expected to help keep all areas of the Practice Lab neat and clean. This includes returning equipment and supplies to their proper place, maintaining bed and mannequins in a professional state, etc. at the end of each lab session.

Simulation Policies
Use of this highly technical and specialized area of the Practice Lab is a privilege and all activity in the area should be undertaken as if it were occurring in an actual clinical facility.

The following policies will be strictly enforced:
1. All students will wear the required student uniform, closed toe shoes, or the clothes worn normally during their clinical activities when participating in simulations.
2. Absolutely no pens of any kind are to be used near the simulators.
3. Learners must bring standard equipment (watch with second hand, stethoscope, etc.) required for clinical during simulator experience.
4. Learners will wash their hands to remove stains, ink or oils prior to entering the simulation area, even if they have washed their hands previously for work in another area of the Practice Lab.
5. No food or drink is allowed in the simulation area of the Practice Lab.
6. Standard precautions will be followed at all times in the simulation area of the Practice Lab. Simulator-learner contact will be adhered to as in the clinical environment.
7. To maximize learning opportunities during the simulation, conversation and discussions will be limited to the scenario itself.

**Safety in the Simulation Area:**
1. Safety of all participants must be of highest priority because the simulator can be cardioverted and defibrillated (**ALL DEFIBRILLATORS ARE ACTIVE & DELIVER AN ELECTRICAL CHARGE**). ACLS guidelines for the use and safety of these interventions must be followed.
2. During certain scenarios, learners may be using gasses such as oxygen (O2). Standard safety precautions are to be followed.
3. For safety, closed toe shoes must be worn when in the simulation area.
4. Use of personal protective equipment (PPE) when warranted.

**Simulation Confidentiality:**
1. Consent to record the simulation will be obtained and kept on file from all members participating in the simulation experience.
2. After a learning experience, students should not share details and activities with other students who have not participated in the learning experience to avoid breaching HIPPA law.

**Appropriate Use of the Simulation Area:**
1. The simulation area will not be used for task training experiences.
2. Simulators shall not be scheduled for clinical make-up days.
3. Once the simulation experience is completed, learners must restore the simulator and environment to the baseline status.
4. Learners who are assessed by the instructor during simulation exercises to need additional practice or remediation for a skill will be referred to the Practice Lab Manager for follow up.
Academic Advising

Pre-paramedic students will be assigned a faculty advisor by the Admissions and Registration office upon admission to GBC. Pre-paramedic students should call the AAS program administrative assistant to schedule an initial advising appointment. During enrollment in the program each student should make an appointment with his/her advisor at least one time per semester to review their progress. Academic advisors will receive a copy of any Notice of Unsatisfactory Performance given to their advisees. However, whenever possible, students experiencing academic problems should be encouraged to meet with their advisor when problems first become apparent rather than waiting until they receive a Notice of Unsatisfactory Performance. Contact the HSHS Administrative Support at 775-327-2301 for assistance in making an appointment with your advisor.

Students experiencing non-academic health or emotional issues which require professional care should be referred for help outside the Health Sciences and Human Services Department. The Student Services Office is the contact for students who need counseling available through UNLV. Director of Disability Support, 775-753-2271 or Jake Rivera, Vice President of Academic and Student Affairs, 775-753-2282.

Information & Academic Technology

Learning Resources
Students must purchase required texts and other learning resources (e.g., online access codes and other learning resources). A list of required learning resources will be provided to all students enrolling in the health science programs. These can be purchased through the GBC Bookstore or through another source. Students should be very careful that all components needed for their classes are included if they purchase from an outside source. Students will be notified if additional learning resources are required prior to the beginning of each subsequent semester.

Library Services:
Media required for paramedic courses are in the Library. These materials are not to be checked out but must be viewed at the Library. For hours of operation, please follow the website: http://www.gbcnv.edu/library/

Copying
Copying can be done at the GBC High Tech Center or the Library. The copy machine in the office area is for faculty use only. Computer copies made from the nursing office printer are $.10 per page. Additional copies of assignment forms are the student’s responsibility.

Technology Assistance
GBC offers a Help Desk for students experiencing problems with WebCampus access. The Help Desk is available by phone (775-327-2170) or by email (helpdesk@gbcnv.edu).

Summer Hours:
Weekdays: 7:00 am to 4:00 pm

Fall and Spring Hours:
Weekdays: 7:30 am to 9:00 pm
Saturday: 12:00 pm to 5:00 pm
Student Representatives

Student representation is encouraged during paramedic program meetings and Health Science and Human Services Advisory Group meetings. Two volunteer representatives from each class are selected. These students are asked to bring questions, comments, and concerns of their class to these meetings and are expected to take information back to their group for discussion and follow-through.

Student Government Association (SGA)

Students are encouraged to be an active part of the Student Government Association (SGA). A variety of activities are provided throughout the school year. Students have the opportunity to participate individually or as a group. There may be some scholarship opportunities for participating in the SGA.

Associated Student Body

Paramedic students are encouraged to be an active part of the Associated Student Body (ASB). A variety of activities are provided throughout the school year. Students have the opportunity to participate individually or as a group.
Scholarships & Financial Aid

Financial Aid is intended to help students pay for their education after high school. The aid available at Great Basin College includes grants, loans, employment, and scholarships, some of which are specifically designated for paramedic students. Students are encouraged to contact Student Financial Services at 775-327-2095 for further information.

Program Costs and Fees

AAS Paramedic Program costs over the two years will vary from year to year. Laboratory fees cover the cost of lab supplies, EMS testing exams, and name tags. Uniforms are purchased prior to entering the first year. The majority of paramedic textbooks are purchased prior to the first semester to enhance learning throughout the two years. Additional expenses in the second year include the cost of the NREMT examination fees, college paramedic pin, pinning ceremony and graduation fees.

Approximate Program Related Costs:

- Estimated in state total program tuition based on fall 2022 fee structure: $6,900.00
- Textbooks & online access fees: $1,500.00
- Uniforms and supplies: Individual amount
- Student Background Check and Drug Screening (required for clinical rotation): $120.00
- Physical Examination: Individual amount
- Health Insurance: Individual amount
- Clinical support items (e.g., watch with second hand, bandage scissors, pen light, safety goggles, black duty boots, black duty pants): Individual amount
- Travel to clinical facilities: Individual amount
- NREMT application and license fees
  - * NREMT Testing Cognitive/Psychomotor exam (Estimated): $450.00
  - * Nevada State Board of EMS licensing fee (Estimated): $25.00
  - * Fingerprinting fee (dependent on location): Depends on location
Building Hours

Building hours vary based on classes and location of each Campus and Center. Health Science and Human Services faculty offices close at 5:00 pm.

Building Use Guidelines

Great Basin College maintains open centers available to faculty, staff, students, and the local community during normal hours. During those days and hours classes, meetings and special events are scheduled security will have staff on site to provide assistance.

Open access to site facilities is provided with the understanding that:
- All persons will be treated with courtesy and respect;
- All buildings and equipment are used in the manner originally anticipated;
- All persons will comply with any posted signage;
- All persons will follow normally accepted safety and behavior standards.

The offer of open access may be revoked should any person be found to cause damages to any Great Basin College property or be involved in harmful, unsafe or illegal behavior while on GBC property.

Security

Security and law enforcement on all Great Basin College centers is dependent upon GBC personnel working well with their respective local law enforcement agencies. Knowledge of any crime or emergency should be reported to the center security or center director immediately. Any crime or emergency requiring immediate assistance should be reported immediately to the police or sheriff by dialing 9-911 on any center phone.

Security may be contacted by dialing the Elko site operator (Dial "0") from any extension and requesting assistance. On the Elko site assistance may be obtained by activating any of the call boxes located on the pathways or phoning the security cell phone at 934-4923. If the police department, fire department or ambulance are required dial, 9-911 from any extension and tell the dispatcher of the emergency.

Fire Evacuation Plan

**Before a fire happens know the following:**
- Know the location of the exit nearest your area (evacuation maps posted).
- Know the location of the fire alarm pull box nearest your area.
- Know the location of fire extinguishers in your area.
- Know how to use a fire extinguisher.

**Upon discovery of a fire:**

1. Pull fire alarm and give verbal warning.
2. Call 911.
3. Follow evacuation procedures.
4. Close doors to contain fire and smoke.
5. If it is safe to do so, and you have been properly trained, you may attempt to extinguish the fire.
6. Determine if it is safe to re-enter the building.
7. On the Elko site, notify your respective Vice President. On all other centers notify the Director and the Vice President of Academic Affairs (Elko Center 775.327-2115).

Food and Beverages in Building Rooms

Students are allowed to have food and beverages in the classroom. Please be courteous of your fellow students and the instructors. Please note that there is nowhere on campus to store food for students.
**Personal Computer Use**

GBC is not responsible for loss or damage to personal property owned by faculty, staff, or students, including personal computers, which are used or left in the building. The college is also not responsible for any thefts or damages done to vehicles parked on the premises. Most areas of the parking lot and the interior of the building are under video surveillance. If a student’s personal computer is used in one of the buildings, a multi-dimensional surge protector (common and transverse spikes) should be purchased and utilized to prevent electrical damage.

**Children and Non-Students in Campus Facilities**

Great Basin College is committed to providing a place of instruction that is conducive to learning; and that is, to the greatest extent possible, free from distractions. Only enrolled students should be present in classrooms, field trips, fitness center(s) and lab facilities.

**Pets**

The only pets (dogs, cats, birds, rabbits, ferrets, etc.) that are allowed anywhere on our campus and inside the buildings are those trained and licensed as service animals. Please do not bring any type of animal into the Gallagher Building or any clinical-related facility you enter. We will have Security help you remove your animal if needed. Please be courteous to our faculty, staff and students and leave your pets at home.

**Tobacco Use / Smoking**

Tobacco use and smoking is prohibited in the Gallagher Health Sciences Building. Please use outdoor designated areas only. In addition, students must comply with all clinical agency policies regarding use of tobacco and smoking while on site.
Application for Graduation

The GBC graduation is the ceremony that celebrates graduation from the college. It is a cap and gown ceremony held at each of the following locations: Pahrump, Winnemucca and Elko Campuses. Paramedic students receive an Associate of Applied Science in Paramedicine degree or a Certificate of Achievement Paramedic. You MUST submit an application for graduation before the set deadline in order to participate and receive a degree. Please refer to the Great Basin College catalog for further information.

Caps and Gowns

Cap and gown orders are placed with the GBC Bookstore. The cost is approximately $45.00.

Graduation Requirements

Students must complete all paramedic and non-paramedic courses to be eligible for graduation. The time frame varies for AAS or Certificate to be eligible for graduation, speak to academic advisor for questions regarding application deadlines. The non-paramedic courses have been placed in the curriculum to augment the paramedic course content. Scheduling arrangements are made with other GBC faculty to assure there will be no time conflict with paramedic classes. If a non-paramedic course is taken out of sequence, there is no guarantee it will be taught at a time that does not conflict with required paramedic courses.

Students are responsible for ensuring that Admission and Records receives an official transcript for transfer courses one month prior to graduation. It is also each student’s responsibility to know and to meet all course requirements and to maintain a 2.3 or high GPA throughout the program.

The Office of Admission and Records uses the year of your admission to the paramedic program to determine catalog year and course requirements for graduation.

Any student taking a general education course during the fourth semester of the paramedic program at another college or university must have the course work completed and an official transcript sent to the Admission and Records Office no less than one month prior to final examinations.

It is the student’s responsibility to make certain all graduation requirements are met. Failure to complete requirements will delay your application to take the National Registry Licensure Examination for Nationally Registered Paramedics (NRP) – See Appendices Section.

Licensure

In the spring semester students begin the process of applying for licensure with the National Registry of EMT’s and the State Board(s) of EMS. Application guidelines for licensing in Nevada will be provided during the first semester of the paramedic program. Application submission, completion, and fees associated with certifications are the students responsibility. Students planning to license in another state are responsible for obtaining and completing the necessary application and paying the fees associated with that application. Fingerprint forms should be completed and submitted by the student to the state for certification.

Students should be aware of the Eligibility Screening Questions on the Nevada Application for License (see Nevada State Board of EMS website). If you can answer any question with a “YES”, meet with the Health and Human Services Dean and call the Nevada State Board of EMS (775) 687-7590 for clarification to determine what will be required to make you eligible to take the NREMT exam post-graduation.
APPENDIX A  Functional Abilities
APPENDIX B  Bloodborne Pathogen Exposure and Prevention Policy
APPENDIX C  Health Sciences Admission and Progression Committee
APPENDIX D  Writing Expectations for Paramedic Students

Standards of Conduct:
APPENDIX E-1  GBC Standards of Conduct for Paramedic Students
APPENDIX E-2  Code of Ethics for EMS Practitioners
APPENDIX E-3  EMT Oath

APPENDIX F  AAS & Certificate of Achievement Program Application and Admission Process

Forms and Agreements:
APPENDIX G-1  Paramedic Program Injury Report
APPENDIX G-2  Exposure to Bloodborne Pathogen Form
APPENDIX G-3  Student Test Query Form
APPENDIX G-4  Notification of Unsatisfactory Student Progress Form
APPENDIX G-5  Student Agreement for the 2022-2023 Academic Year
APPENDIX G-6  Agreement to Participate in Practice Lab Procedures
APPENDIX G-7  Confidentiality Agreement and Consent for Photography and Video Recording
Functional Abilities (Technical Standards)

The practice of paramedicine requires the following functional abilities with or without reasonable accommodations:

Visual acuity must be adequate to assess patients and their environments, as well as to implement the paramedic care plans that are developed from such assessments. Examples of relevant activities (nonexclusive):

- Detect changes in skin color or condition
- Collect data from recording equipment and measurement devices used in patient care
- Detect a fire in a patient area and initiate emergency action
- Draw up the correct quantity of medication into a syringe

1. Hearing ability must be of sufficient acuity to assess patients and their environments and to implement the paramedic care plans that are developed from such assessments. Examples of relevant activities (nonexclusive):

- Detect sounds related to bodily functions using a stethoscope
- Detect audible signals generated by mechanical systems that monitor bodily functions
- Communicate clearly in telephone conversations
- Communicate effectively with patients and with other members of the healthcare team

2. Olfactory ability must be adequate to assess patient and to implement the paramedic care plans that are developed from such assessments. Examples of relevant activities (nonexclusive):

- Detect foul odors of bodily fluids or spoiled foods
- Detect smoke from burning materials
- Detect ketones on a client’s breath

3. Tactile ability must be sufficient to assess patient and to implement the paramedic care plans that are developed from such assessments. Examples of relevant activities (nonexclusive):

- Detect changes in skin temperatures
- Detect unsafe temperature levels in heat-producing devices used in patient care
- Detect anatomical abnormalities, such as subcutaneous crepitus, edema, or infiltrated intravenous fluid
- Perform techniques such as the insertion of urinary catheters

4. Strength and mobility must be sufficient to perform patient care activities and emergency procedures. Examples of relevant activities (nonexclusive):

- Safely transfer patients in and out of bed and assist them with ambulation using appropriate assistive devices
- Safely control the fall of a patient, by slowly lowering the patient
- Turn and position patients as needed to prevent complications due to bed rest
- Hang intravenous bags at the appropriate level
- Accurately read the volumes in body fluid collection devices hung below bed level
- Perform cardiopulmonary resuscitation

5. Fine motor skills must be sufficient to perform psychomotor skills integral to patient care. Examples of relevant activities (nonexclusive):

- Safely dispose of needles in sharps containers
- Accurately place and maintain position of stethoscope for detecting sounds of bodily functions
- Manipulate small equipment and containers, such as syringes, vials, ampoules, and medication packages, to administer medications

6. Physical endurance sufficient to complete assigned periods of clinical practice and to function effectively under stress in acute health care situations.

7. Ability to speak, comprehend, read, and write English at a level that meets the need for accurate, clear and effective communication.
8. Emotional stability to function effectively under stress, to work as a part of a team and to respond appropriately to supervision; to adapt to changing situations, to respond appropriately to patients and families under stress, and to follow through on assigned patient care responsibilities.

9. Cognitive ability to collect, analyze, and integrate information and knowledge to make clinical judgments and management decisions that promote positive patient outcomes.

10. Other abilities sufficient to demonstrate competencies such as the ability to arrive to a clinic on a timely basis; to meet the demands for timely performance of duties; to meet the organizational requirements to perform these duties in a professional and competent manner.
Bloodborne Pathogen Exposure and Prevention Policy

The Paramedic Program has developed a Bloodborne Pathogen Exposure and Prevention Policy to be in compliance with Occupational Safety and Health Administration (OSHA) Standards. The policy is intended to provide direction to students and faculty to help prevent exposure to bloodborne pathogens and guidance should such exposure occur.

The purpose of this policy is to reduce the risk of student exposure to air and body substance pathogens such as, but not limited to, Tuberculosis, Hepatitis B Virus (HBV), Hepatitis C Virus (HCV), and the Human Immunodeficiency Virus (HIV).

HIV Screening

The GBC paramedic programs will not undertake any program of screening faculty or students for antibody to HIV. Any student or faculty wishing to be tested will be referred to his/her private physician.

Standard Precautions

Standard Precautions is an approach to infection control that requires the application of blood and body fluid precautions for all patients and patient specimens regardless of diagnosis. Standard precautions will be the minimum standard of practice throughout courses offered in the paramedic programs at GBC where bloodborne pathogen exposure could occur.

Methods of Compliance

Students must become familiar and comply with the GBC Paramedic Pathogen Exposure and Prevention Policy. Students must also become familiar and comply with the exposure plan (needle stick policy) of the clinical sites to which they are assigned.

Prevention of Bloodborne Pathogen Exposure

- Students are required to participate annually in Bloodborne Pathogen Exposure Prevention and Control Class. The student must also have satisfactorily demonstrated skill in using protective equipment and procedures before receiving a patient care assignment.
- Students must have documented immunity to hepatitis B, Measles, rubella, varicella, and diphtheria prior to going to any clinical site.
- The decision to exempt a student from clinical experience will be made on a case-by-case basis by the faculty responsible for the clinical course.
- All students must have medical insurance upon entering and throughout their enrollment in the paramedic program. It is the student’s responsibility to obtain and pay for this insurance, as well as to understand the benefits and limitations of any insurance they maintain or is maintained on their behalf.

Occurrence of Exposure or Incident

**Student:**
A student in the GBC paramedic programs who has exposure to blood, body fluid or other potentially infectious material to non-intact skin or mucous membranes from a needle stick, sharps injury or other cause must immediately:
- Wash needle stick and cuts with soap and water
Flush splashes to the nose, mouth or skin with copious amounts of water
Irrigate eyes with clean water, saline or sterile irrigates
Remove soiled personal protective equipment and/or clothing as soon as possible.

After washing, flushing and/or irrigating the exposed area, the student must immediately:
- Notify the appropriate registered nurse/paramedic preceptor at the clinical facility **AND**
- Notify clinical faculty who will then implement the process below. (If there is a witness to the incident, have them do this immediately if possible.)

**Faculty:**
The clinical faculty will be responsible for coordinating the following procedures:
- Identify the source of the exposure.
- Obtain consent from source client, if not in chart.
- Determine who will be the health care provider for the student for counseling and treatment if needed.
- Send the student to their health care provider to obtain medical evaluation and post-exposure follow-up within 1 to 2 hours of the exposure.
- Student should bring a copy of the documents with as much completed information as possible related to the incident to their health care provider. They should also have the contact number for source information (such as employee health office) so that the health care provider may obtain results.
- Initiate the documentation needed for GBC and the clinical agency.

**Note:**
The National HIV/AIDS Center provides a PEPline, a Clinicians’ Post-Exposure Prophylaxis Hotline which offers up-to the minute advice on managing occupational exposures (needlesticks, etc.) to HIV, hepatitis and other bloodborne pathogens. It is offered 24 hours a day, 7 days a week at 1-888-488-4911.

**Documentation and Follow-up**

**Student and Faculty:**
- Notify the Dean of Health Science and Human Services of the incident as quickly as possible
- Complete an incident report at the clinical facility, if required; and be aware of and follow any reporting and follow-up requirements of the clinical facility.
- Complete a GBC Paramedic Exposure to Bloodborne Pathogens form.
- It is the student’s responsibility to make his/her healthcare provider aware of the result of any blood panel drawn as a result of an exposure.

The National HIV/AIDS Center provides a PEPline, a Clinicians’ Post-Exposure Prophylaxis Hotline which offers up-to the minute advice on managing occupational exposures (needle sticks, etc.) to HIV, hepatitis and other bloodborne pathogens. It is offered 24 hours a day, 7 days a week at 1-888-488-4911.
Department of Health Science and Human Services

HEALTH SCIENCE ADMISSIONS AND PROGRESSION COMMITTEE

Membership:

1. Six (6) Faculty:
   a. One (1) teaching in the AAS Nursing Program, one (1) teaching in the RN-BSN Program, one (1) teaching in the AAS Radiology Technology Program, one (1) teaching in the EMS/Paramedic Program, one (1) teaching in the Human Services Program, and one (1) at-large Health Science and Human Services Department faculty member.
   b. At least one of the faculty must be tenured.
   c. Faculty members of the committee will be selected spring semester at the last departmental faculty meeting.
   d. In the event that a committee member cannot attend an Admission and Progression meeting, that member shall find a representative from within their program, if possible, to serve as proxy for that meeting. If there are no student appearances expected for the meeting, written proxy of vote(s) on the issues addressed on the agenda for that meeting is also an acceptable substitute.

2. The Administrative Assistant for the department will service as an ex-officio member of the committee without voting privileges and will coordinate staff support for the committee.

Term of Service:

1. Faculty serve a two-year term and may serve additional terms.

Functions:

1. Make recommendations to Department of Health Science and Human Services faculty regarding policies and procedures for student admission to department health science degree programs.

2. Review applications and select students for admission to departmental health science degree programs, including review of appeals for readmission.

3. Review and make decisions related to progression or reinstatement of individual students in health science degree programs.

4. Assure the collection and dissemination of formative and summative data for evaluation of admission and progression; use relevant data admission and progression decisions.
Writing Expectations for Great Basin Paramedic Students

Purpose:

- Articulate writing competencies required of paramedic students.

Expectations for Written Assignments:
All written assignments are to be in APA 7th Edition format and submitted by Word document on the due date, unless otherwise specified by faculty. Writing competencies to be demonstrated by students are as follows:

- Use terminology, sentence construction, citation style, formatting, grammar, and punctuation consistent with scholarly writing.

- Write content that is purposeful, logically sequenced, organized, and, derived from evidence-based materials such as peer reviewed journals, course textbooks, best practice guidelines, outcomes management reports or other scientifically based literature.

- Reference scholarly content consistent with APA 7th Edition; refrain from using web sites intended for layman, medical consumers, marketing sites, or references less rigorously reviewed for scientific merit, unless appropriate for specific purposes such as patient education. Deviation from required APA formatting will be indicated by faculty when warranted.

- Document reflective thought, thinking, reasoning and judgment when responding to specific questions and assignments such as patient education, journaling, and peer evaluations.

- Pursue academic writing in a manner consistent with the standards of academic integrity adopted by Great Basin College. This includes scrutinizing written materials to assure that authors, sources and websites are properly cited.

- Acknowledge late assignments will not be accepted or will be penalized unless prior arrangements are made with faculty.

- If the writing requirements are not met for an assignment, then points may be deducted, the assignment may need to be rewritten, or the assignment may receive a failing grade.
GBC Standards of Conduct for Paramedic Students

All paramedic students are held to the GBC and NSHE Student Conduct Policies as published in the GBC Catalogue.

It is expected that paramedic students will come to class, practice lab, clinical assignment and/or testing sessions in a condition conducive to competent and safe performance. Paramedic faculty are held legally and professionally accountable for taking prompt, appropriate, and decisive action if a student is unable to perform the essential functional abilities required for satisfactory completion of all aspects of the paramedic program.

Examples of physical, cognitive, behavioral problems and lack of competency which may be questioned include, but are not limited, to:

- Frequent absenteeism and/or tardiness (no documented medical reason for absence).
- Drowsiness or sleepiness.
- Smell of alcohol on the breath/body.
- Increased inability to meet schedules and deadlines.
- Slurred/incoherent speech or speech pattern different from normal speech.
- Unusually aggressive behavior.
- Unexplained change in mood.
- Change in appearance.
- Lack of manual dexterity.
- Lack of or decreased coordination in body movement.
- Inappropriate responses to stimuli.
- Unexplained work-related accident or injury.
- Inattentiveness to work.

Students who arrive to class, practice lab, clinical assignment and/or testing sessions who are considered by their instructor to be unable to safely or effectively carry out required program related activities may be subject to:

1. having their work performance and behavior witnessed and documented
2. questioning in private as to the nature of the problem
3. meeting with the Dean
4. referral to the appropriate GBC administrative staff member
5. receiving a failing grade and dismissal from the program.
6. possible ineligible for readmission.
Code of Ethics for EMS Practitioners

Professional status as an Emergency Medical Services (EMS) Practitioner is maintained and enriched by the willingness of the individual practitioner to accept and fulfill obligations to society, other medical professionals, and the EMS profession. As an EMS practitioner, I solemnly pledge myself to the following code of professional ethics:

❖ to conserve life, alleviate suffering, promote health, do no harm, and encourage the quality and equal availability of emergency medical care.

❖ to provide services based on human need, with compassion and respect for human dignity, unrestricted by consideration of nationality, race, creed, color, or status; to not judge the merits of the patient’s request for service, nor allow the patient’s socioeconomic status to influence our demeanor or the care that we provide.

❖ to not use professional knowledge and skills in any enterprise detrimental to the public wellbeing.

❖ to respect and hold in confidence all information of a confidential nature obtained in the course of professional service unless required by law to divulge such information.

❖ to use social media in a responsible and professional manner that does not discredit, dishonor, or embarrass an EMS organization, co-workers, other health care practitioners, patients, individuals or the community at large.

❖ as a citizen, to understand and uphold the law and perform the duties of citizenship; as a professional, to work with concerned citizens and other health care professionals in promoting a high standard of emergency medical care to all people.

❖ to maintain professional competence, striving always for clinical excellence in the delivery of patient care.

❖ to assume responsibility in upholding standards of professional practice and education.

❖ to assume responsibility for individual professional actions and judgment, both in dependent and independent emergency functions, and to know and uphold the laws which affect the practice of EMS.

❖ to be aware of and participate in matters of legislation and regulation affecting EMS.

❖ to work cooperatively with EMS associates and other allied healthcare professionals in the best interest of our patients.

❖ to refuse participation in unethical procedures and assume the responsibility to expose incompetence or unethical conduct of others to the appropriate authority in a proper and professional manner.

Revised and adopted by the National Association of Emergency Medical Technicians, June 14, 2013.
EMT Oath

Be it pledged as an Emergency Medical Technician, I will honor the physical and judicial laws of God and man. I will follow that regimen which, according to my ability and judgment, I consider for the benefit of patients and abstain from whatever is deleterious and mischievous, nor shall I suggest any such counsel. Into whatever homes I enter, I will go into them for the benefit of only the sick and injured, never revealing what I see or hear in the lives of men unless required by law.

I shall also share my medical knowledge with those who may benefit from what I have learned. I will serve unselfishly and continuously in order to help make a better world for all mankind.

While I continue to keep this oath unviolated, may it be granted to me to enjoy life, and the practice of the art, respected by all men, in all times. Should I trespass or violate this oath, may the reverse be my lot.

So, help me God.

________________________________________
Written by: Charles B. Gillespie, M.D.
Adopted by the National Association of Emergency Medical Technicians, 1978
Students are admitted each year in the fall semester only.

Application information is available on the GBC website after February 1st. The complete application packet submission deadline is June 6th for the following fall semester. Additionally, all applicants must have a current EMT or AEMT license by June 6th of the application year.

The Admission and Progression Committee of the Great Basin College Health Sciences and Human Services Department evaluates qualifications for each applicant and ranks them for admission to the associate degree paramedic program based on criteria set by the paramedic faculty.

All individuals with complete applications and meeting minimum requirements for admission will be ranked on the following criteria: (1) GPA in prerequisite and general education courses, (2) number of required general education courses completed, (3) residency.

Applicants not selected will not be carried forward to the next application year and must complete a new application for admission each year in which they apply.

Notification of acceptance into the paramedic program and a Letter of Intent are mailed to applicants no later than mid July for enrollment in August. Admission to the program is considered final only when the applicant returns the signed Letter of Intent included in the notification of acceptance and attends the mandatory paramedic program new student orientation in July to begin the Fall program. Appeals of admission decisions will be referred to the GBC Department of Health Sciences and Human Services Admission and Progression Committee.

In addition to attendance at the mandatory paramedic program new student orientation in July, new associate degree or certificate of achievement paramedic students are required to submit evidence of a satisfactory physical examination, provide proof of immunizations (TB testing, MMR, TDAP, Hepatitis B, Influenza), provide proof of health insurance coverage, and provide proof of current professional AHA CPR.

Complete information on application and admission procedure can be found with the application of the AAS in Paramedicine or Certificate of Achievement Paramedic website at: https://www.gbcnv.edu/programs/health_sciences/aas_ems/aas_ems_new.html

Transfer Students
Because of the curriculum variability among paramedic programs, transfer students are not accepted from other paramedic programs.

Cardio-Pulmonary Resuscitation
Student must provide evidence of a current Healthcare Provider CPR card on admission to the paramedic program. The student must maintain current certification throughout their tenure in the paramedic program.

Criminal Background Check and Drug Screening
Certain clinical agencies mandate criminal history background checks and drug screening for all individuals engaged in patient care. All students must undergo criminal history background checks and drug screening. These checks are conducted by an external vendor and the information is sent to the clinical agency requiring this information, and NOT sent to the College. Agency personnel will evaluate the information they receive and, in their sole discretion, make the final determination as to each student’s ability to participate in patient care in their agency. If a student is denied clinical placement by any clinical agency due to positive criminal history information or drug screening results, the student will be unable to complete paramedic program requirements and will be dismissed from the paramedic program.
NOTE: Students with a criminal history are potentially ineligible for licensure in the State of Nevada. Students with questions regarding their eligibility may contact the EMS Program Director or the Nevada State Board of EMS for clarification.

**Learning Resources**
Students must purchase required texts and other learning resources (e.g., course access codes.) A list of required learning resources will be provided to all students enrolling in the paramedic program. Students will be notified if additional learning resources are required prior to the beginning of each subsequent semester.

**Financial Assistance**
Financial Aid is intended to help students pay for their education after high school. The aid available at Great Basin College includes grants, loans, employment and scholarships, some of which are specifically designated for paramedic students. Students are encouraged to contact Student Financial Services at 775-753-2399 for further information.

**Employment**
Students who are employed by a health facility while enrolled in the paramedic program must be aware of changing student/employee roles. For example, a student who is employed on week-ends as an EMT or AEMT should never exceed the responsibilities of that position relating to facility protocol, even though students have learned new procedures as a result of being a paramedic student. It is imperative that a student accepts assignments within his/her scope of practice as outlined in the specific job description. An unlicensed paramedic student should not accept employment that requires him/her to perform duties that should be performed only by a licensed paramedic. Students are accountable for their actions and are urged to use reasonable and prudent care in accepting a position and in fulfilling their responsibilities as employees.

Students are not considered official representatives of the Great Basin College AAS Paramedic Program or Certificate of Achievement Paramedic Program. Neither Great Basin College nor the Health Sciences and Human Services Department accept responsibility for the actions of students working in healthcare agencies in an employee or volunteer status.

GREAT BASIN COLLEGE
ASSOCIATE OF APPLIED SCIENCE & CERTIFICATE OF ACHIEVEMENT PARAMEDIC PROGRAM

STUDENT AGREEMENT FOR THE 2022-2023 ACADEMIC YEAR

I have read, understand and agree to abide by the policies and guidelines stated in the Great Basin College Associate of Applied Science Degree & Certificate of Achievement Paramedic Program 2022-2023 Student Handbook.

(initial)

I understand that as a condition of enrollment in Great Basin College’s Associate of Applied Science Degree & Certificate of Achievement Paramedic Program, I agree that a clinical agency may, at any time, require a “for cause” drug and/or alcohol screen. I agree to execute a consent for release of the results of the drug and/or alcohol screening information to the clinical facility/agency should they request such information.

(initial)

I understand and acknowledge that once admitted to the Great Basin College’s Associate of Applied Science Degree & Certificate of Achievement Paramedic Program, failure to maintain the professional and/or ethical standards of the program may result in dismissal from the program. I also understand that the Health Science and Human Services Department Admission and Progression Committee may at any time request information from the Administrative Officer of Great Basin College to determine whether I have ever violated NSHE (Nevada System of Higher Education) Code.

(initial)

I understand and acknowledge that no resources or information from any paramedic course can be shared outside the classroom, clinical, practice lab or simulation.

My emergency contact person(s) are as follows: I understand that this individual or individuals are responsible for ensuring that I am transported home in the event one of my faculty or the Associate of Applied Science Degree Dean determines that I am not able to continue being present in the classroom, lab, or clinical setting.

GREAT BASIN COLLEGE

ASSOCIATE OF APPLIED SCIENCE & CERTIFICATE OF ACHIEVEMENT PARAMEDIC PROGRAM

Agreement to Participate in Practice Lab Procedures
For the 2022-2023 Academic Year

During my enrollment in the Associate of Applied Science Degree or Certificate of Achievement in Paramedic Program and under the direct supervision of a paramedic faculty member, I agree to allow a paramedic student classmate to perform the following procedures on my person:

1. Subcutaneous injection
2. Intradermal injection
3. Intramuscular injection
4. Intravenous catheterization (peripheral)

I agree to hold harmless and waive the liability of the student and/or students performing the procedure(s), the supervising instructor and Great Basin College for any injuries incurred as a result of my agreeing to have these procedures performed on my person.

Student Name                                Student Signature                                Date

_________________________________________  ____________________________
Witness: (Faculty/ Dean)                      Date

Complete this copy of the Agreement and return to the GBC Health Science and Human Services Department.
During your participation at the Great Basin College Practice Lab, you will be an active participant and observer of the performance of other individuals in the management of acute medical, surgical, and other health care events in simulated experiences.

The objective of the simulation experience program is to educate pre-licensed and licensed health care practitioners to better assess and improve their performance in evolving health care situations. Simulations are designed to challenge a healthcare professional’s response and judgment in stress environments.

Due to the unique aspects of this form of training, you are required to maintain and hold confidential all information regarding the performance of specific individuals and the details of the scenarios.

There is continuous audiovisual digital recording during all simulations which will be used for educational purposes. This video recording is considered a QUALITY ASSURANCE TOOL and is protected by Federal Law.

By signing this agreement, you agree to maintain strict confidentiality regarding both your and others' performance, whether seen in real time, on video, or otherwise communicated to you. Failure to maintain confidentiality may result in unwarranted and unfair defamation of character of the participants.

To maintain optimal simulation experiences for other learners who will be following you in the center, you are to maintain strict confidentiality regarding the specifics of the scenarios. A breach of confidentiality may result in loss of privileges in the Practice Lab.

By signing below, you acknowledge you have read and understand this statement and agree to maintain the strictest confidentiality about the performance of individuals and the simulation scenarios you observe.

I agree to maintain strict confidentiality about the details of the scenarios and the performance of other participants during scenarios at Great Basin College Practice Lab.

I authorize the Great Basin College Practice Lab to use the video recording(s) and photographs made in the Practice Lab for the following purposes:

1) Debriefing scenario participants,
2) Administrative review,
3) Educational research,
4) Commercial purposes, which can include public relations, promotional advertisements, and/or fund-raising activities. I understand that, unless otherwise approved by me, I will not be specifically identified.
