

HUMAN SERVICES

Bachelor of Applied Science
(BAS)

HUMAN SERVICES

Bachelor of Applied Science

STUDENT LEARNING

Graduates with a BAS emphasis in Human Services Behavioral Health, Substance Abuse and Addiction Medicine:

- Demonstrate knowledge of an array of theories applied to human services and substance abuse counseling.
- Demonstrate a range of professional counseling skills sufficient to conduct human service and substance abuse counseling interventions.
- Apply effective professional and clinical communication skills orally and/or in writing and interact effectively with other helping professionals.
- Analyze research and apply professional literature to the practice of human service and substance abuse counseling professions.
- Deliver professional services within the guidelines of the ethical and professional practice of the human services and substance abuse counseling field, including culturally competent care.
- Demonstrate competencies in comprehensive treatment admissions screening, intake processes and procedures, clinical assessment, diagnosis of substance abuse disorders and pathologically addictive behavior, treatment planning and discharge and aftercare planning.
- Demonstrate understanding of social change processes through community development, advocacy and public policy.
- Demonstrate professional readiness to secure a position in the helping profession or gain entrance to graduate programs (i.e. Marriage and Family Therapy, Clinical Social Work, Psychology, Criminal Justice).
