

## ***Library Advisory Group Information Report***

*May 16, 2023*

The Library Advisory group wishes to inform the Senate that the library, in consultation with impacted departments, has opted not to continue the subscription to Films on Demand due to low usage and high cost. The cost of the subscription will be reallocated to expand our access to JSTOR materials in a variety of fields or, in the event of pricing changes which will be negotiated over the summer, continue existing subscription services. Films on Demand will remain active until the end of the current fiscal year.
